information possible;

c. liaise with the appropriate civil authorities in order to complete the relevant portions of Part 2 of the UFO pro-forma;

d. assess the likely cause of the sighting, if possible, and sign the form.

7. In cases where remoteness of the area of observation makes a personal interview impractical, or where the Formation or Unit Commander is satisfied from the initial inquiry that nothing would be gained from such a procedure, he should arrange for Part 1 of the pro-forma to be forwarded and completed by the observer (preferably in the presence of a police officer, an officer of another Service or other responsible person) and return it to the investigating officer.

8. The Investigating Officer is to examine the report and endeavour to identify the object by liaison with regional meteorological stations, Air Traffic controllers, observatories, spacetracking stations or other organisations in the area.

9. Two copies of the completed pro-forma and Investigating Officer's report are to be forwarded to Command Headquarters (for attention C Intell O) as soon as practicable.

10. Formation or Unit Commanders are to ensure that no member, in particular the Investigating Officer, makes any statements to the press or public about any aspect of a UFO report already received, the progress of any investigation or the RAAF assessment of the probable cause. Requests for information should be directed to the Department of Air where such inquiries will be dealt with by the Directorate of Public Relations.

UN-IDENTIFIED FLYING OBJECTS REPORTS

Reference: A. Our 5/6/Air(18) 18 9th June 1969

1. Department of Air advise that it has become necessary to emphasise the need for additional thought and effort to be put into Part 2 of the UFO report forms. Recent examples received have only dashes or blanks as answers to specific questions, which does not give any indication of the information obtained or sought by the investigating officer.

2. Typical faults include:-

a. No entry in the section relating to civil aircraft in the area. There was nothing to indicate that any effort had been made to find an answer.

b. No entry in the planet calculation section. Not only was Venus in the appropriate position at the time, but it was also at its greatest brilliancy.

c. Many reports have had no answers to the last three questions on the old form, which makes the entire report virtually useless. The investigating officer is the only person with enough knowledge of the situation to make an estimate of the cause, unless it has been definitely identified from answers to previous questions.

3. As you no doubt are aware, the public is becoming more and more susceptible to the UFO syndrome and for publicity purposes, the press and radio thrive on it. This, in turn, generates questions from political quarters which require answers, sometimes at ministerial level. Unless effort is put into the original investigation, it is obvious that meaningful or credible answers cannot be supplied.

4. Investigating officers are to be advised of the Departmental requirements.

UN-IDENTIFIED FLYING OBJECTS
REVISED FORMAT OF REPORTS

References: A. Support Command Air Staff Instruction 3/3
B. Our 5/6/Air(10) 16th 10 September 1968

1. The format used for Un-identified Flying Object reports has again been revised, in order to obtain slightly more scientific data for the Defence Science Section. The new form, titled "Report on Unusual Aerial Sighting", is to be used as from receipt of this letter. 17

2. All questions are required to be completely answered in writing; a dash conveys no information at all. On completion of the questionnaire and after full evaluation by the investigating officer, some indication of the nature of the occurrence is necessary.

3. Two copies of the completed form are to be forwarded to this Headquarters where, after preliminary examination, one copy will be forwarded to Department of Air. It should be noted that reports are to be routed through Headquarters Support Command and not sent direct to Department of Air.

4. Section 3 of Support Command Air Staff Instructions will be amended to conform to the above requirements.

REPORTED PARTICIPATION OF AN RAAF OFFICER AT
A SCIENTIFIC SEMINAR IN ADELAIDE - 30 OCT 71

Reference: A. E200 AI 153 31 Mar 71

1. Attached is a photostat of an article which appeared in "The News", Adelaide on Wednesday, 6th October 1971. A spokesman for the Australian and New Zealand Association for the Advancement of Science has denied that the body has made any claim that the speakers at the symposium referred to will include an RAAF officer who has investigated sightings. Mr. Colin Harris of the so-called "The Australian Flying Saucer Research Society - Adelaide" has also stated that he has not issued such a statement to the Press at any time.

2. "The News" representative informed Edinburgh that the statement regarding RAAF participation in the symposium was passed to the paper by "the UFO authorities" and of his own volition undertook to investigate the matter further.

3. The above is advised for information.

Talks on flying saucers

UFO enthusiasts from all States are assembling for a symposium to be held in Adelaide on October 22.

The symposium, organised by the Australian and New Zealand Association for the Advancement of Science, will discuss many aspects of unidentified flying object sightings.

Speakers will include AS [illegible] UFO [illegible] Unidentified Sightings.

Those wishing to attend must enrol with ANZAAS (telephone 23-3638) before October 22.

A fee of $3 will cover the day's lectures, copies of a condensed version of all papers delivered, and morning and afternoon tea.

GENERAL STATEMENT IN RELATION TO
UNIDENTIFIED FLYING OBJECTS

1. Your report on the sighting of an Unusual Flying Object (UFO) has been investigated and the object was .....
.....(investigator's report).....

2. You may be interested in the investigation of reports in Australia, the United States and the United Kingdom and the following information provides a brief outline of the subject.

3. The investigation of reports of UFOs in Australia is carried out by the Royal Australian Air Force, Directorate of Air Force Intelligence, at the Department of Air in Canberra. A considerable amount of effort is spent in investigating each report and the majority of observers are interviewed by selected RAAF personnel.

4. Between 23 January 60 and 26 May 71, the RAAF received 572 UFO reports. Department of Air has assessed that 93 percent were explainable by present scientific knowledge. Six percent of the reports did not provide sufficient information to permit proper analysis and evaluation. One percent of the reports were attributed to unknown causes.

5. The United Kingdom Air Ministry has stated that on an average, 90 percent of the sightings it investigates are explained by causes ranging from meteorological balloons and meteors to aircraft lights. The other 10 percent probably remain unexplained because of lack of reliable information.

6. In 1966 the University of Colorado, under contract to the USAF, spent two years processing and investigating all American reports. Its findings have been published by Bantam Books as 'The Condon Report'. Its general conclusion is that 'nothing has come from the study of UFOs in the past 21 years that has added to scientific knowledge' and that 'further extensive study of UFOs probably cannot be justified in the expectation that science will be advanced thereby'. A panel of eminent scientists, chosen by the US National Academy of Sciences, has examined and endorsed the Condon Report.

/7. The

7. The USAF 'Project Blue Book' investigation of unidentified aerial objects between 1953 and 1965 analysed 7,641 UFO reports. It concluded that:

a. 80 percent of sightings were natural phenomena, hoaxes, birds or man-made objects;

b. 17 percent of sightings provided insufficient data to permit thorough analysis and evaluation; and

c. three percent were unidentified.

8. US and Soviet space exploration has found no evidence to support the theory of life on planets in our solar system. It seems that the Mariner series of space exploration to Mars has proved it a 'dead' planet. The only other source of extra-terrestrial life, then, would have to be in another 'solar system'. It would seem, therefore, that whilst it may be possible for extra-terrestrial life forms to visit Earth, it is improbable.

Hagersville, Ontario,
CANADA

17 - SEP 1971

Dear Sir,

Thank you for your letter of 28th June, 1971.

As regards the metallic balls mentioned in the attachment received with your letter, we have ascertained that some metallic balls were found in 1963 in the region to the north of Broken Hill, New South Wales.

These were analysed by the Australian Weapons Research Establishment. From information we have obtained from that organisation, it would appear that the origin of these metallic balls has never been finally determined. However, from the evidence available, it is thought highly probable that they were part of the pressuring system of either a satellite or a satellite launcher, which made its re-entry over the Australian continent. In any case, there was no evidence that the metal analysed was of non-terrestrial origin.

You may be interested to know that part of one of these metallic balls is said to be in the possession of the Mayor of Broken Hill.

Yours faithfully,

(F.C. SUTHERLAND)
Acting Secretary

PAT 22 Aug 71

MINUTE PAPER

(This side only to be written on)

554/1/30 (64)

Subject: UNIDENTIFIED FLYING OBJECTS.

Note of Action.

1. Today rang Col.E.G.Foreshew, at the Weapons Research Establishment Salisbury, South Australia (Ph. 082599), to gather more information in relation to the analyses of metallic balls (found WRE 1963.) and a piece of metal from the Shepperton incident, (date and details unknown.)

2. Col.E.G.Foreshew is or was the WRE safety officer.

3. Col. Foreshew can recall no details of the 'Shepperton Incident'. It is thought to date from the period 1953-54. However, he recalls a metal spindle which was analysed , probably in the early 1960's, and this was shown to be part of an early type of refrigerator.

4. He also recalls the analysis of metal lic balls which were found to the North of Broken Hill in about 1963. The origin of these metallic balls was never finally determined. However, it is thought probable that they were part of the pressuring system of a satellite or a satel lite launcher , which made its re-entry over the Australian continent. Part of one of these metallic balls is said to be in the possession of the Mayor of Broken Hill.

20 Apr 1971.

The Secretary,
Department of Air,
Russell Offices,
Canberra, A.C.T. 2600,
Australia.

Dear Sir:

The attached page relates the rather unusual discovery, in Australia, of three seemingly unidentified metal objects in 1963. I have been in touch with the Australian High Commission in Canada, and they referred me to this address.

I am extremely interested in learning what the outcome of any investigation into these objects has been, specifically, whether their nature and origin has been determined. Any information that you could supply in this matter would be greatly appreciated.

Thanking you in advance, I remain

Yours very truly,

Craig Sitter

Craig Sitter.

A
RECEIVED
6 JUL 1971
AIR REGISTRY
CANBERRA

On April 8, 1963, an Australian ranger named J. McClure brought in from the desert of New South Wales a shiny metal sphere about fourteen inches in diameter, weighing twelve pounds. It had been spotted from overhead by a plane which was crossing a part of the desert that had been shunned by human beings for at least fifty years. McClure turned his find over to the government for further investigation.

On June 28, at a point about sixty miles from the scene of McClure's discovery, another shiny metal sphere was found. Like its predecessor, it was perfectly smooth, brightly polished, and without any aperture of any kind to give access to the interior. It was about sixteen inches in diameter and weighed slightly more than eighteen pounds.

The third of these unusual spheres was picked up on July 12th, near Muloorina, New South Wales. It was about six inches in diameter, weighed seven pounds, and had one small aperture, about half an inch in diameter, which enabled investigators to ascertain that the sphere was lined with lead.

Mr. Allen Fairhall, the Australian Minister of Supply, went before the House of Representatives on April 30, 1963, to brief them on the matter. He said that Australian scientists were puzzled by the objects. He added that they had no idea what they were or where they came from. And he also stated that efforts to open the first sphere with drills and hacksaws had been futile.

CTS

554/1/30(67)

UNIDENTIFIED FLYING OBJECTS

S/AIR/38

1. You spoke to me recently on the matter of unidentified flying objects (UFOs) and you mentioned that the Department of Supply may be interested in investigating this subject. This minute provides a brief historical sketch of this subject and my reaction to the proposal.

2. In June 1947, an Idaho businessman and private pilot named Kenneth Arnold publicly reported sighting a formation of disc-shaped objects near Washington. There soon followed a rash of reports of unidentified aerial objects, or 'flying saucers'. In subsequent years UFOs have been frequently reported in the USA, the UK and Australia.

3. Because of concern for national security, government authorities in these countries have attempted to investigate every report of this kind. In 1966 the University of Colorado, under contract to the USAF, spent two years processing and investigating all American reports. Its findings have been published by Bantam Books as 'The Condon Report'. Its general conclusion is that 'nothing has come from the study of UFOs in the past 21 years that has added to scientific knowledge' and that 'further extensive study of UFOs probably cannot be justified in the expectation that science will be advanced thereby' (page 1). A panel of eminent scientists, chosen by the US National Academy of Sciences, has examined and endorsed the Condon Report.

4. The USAF 'Project Blue Book' investigation of unidentified aerial objects between 1953 and 1965 analysed 7,641 UFO reports. It concluded that:

a. 80 percent of sightings were natural phenomena, hoaxes, birds or man-made objects;

b. 17 percent of sightings provided insufficient data to permit thorough analysis and evaluation; and

c. three percent were unidentified.

5. The UK Air Ministry has stated that, on an average, 90 percent of the sightings it investigates are explained by causes ranging from meteorological balloons and meteors to aircraft lights. The other 10 percent probably remain unexplained because of lack of reliable information.

6. Between 23 Jan 60 and 26 May 71 the RAAF received 572 UFO reports (summaries enclosed). Department of Air has assessed that 93 percent were explainable by present scientific knowledge. Six percent of the reports did not provide sufficient information to permit proper analysis and evaluation. One percent of the reports were attributed to unknown causes.

7. US and Soviet space exploration has found no evidence to support the theory of life on planets in our solar system. It seems that the Mariner series of space exploration to Mars has proved it a 'dead' planet. The only other source of extra-terrestrial life, then, would have to be in another 'solar system'. It would seem, therefore, that whilst it may be possible for extra-terrestrial life forms to visit Earth, it is improbable.

/8.As

FLAG D

6. As I advised you, although I am directly concerned with any possible threat to Australian security, I am not particularly interested in the subject of UFOs, even though my directorate devotes valuable time to this problem. I accept the US assessments without question and consider that it would be a complete waste for we here in Australia to spend valuable time and money in further detailed investigations. However, should the Department of Supply wish to undertake such studies the records of this directorate would be freely available. It would have to be pointed out to Supply, however, that the RAAF could provide no additional assistance in the matter and Supply would have to undertake all facets of the further investigations.

550-1-30 Pt 2.

Gt. 4117

Subject: FLYING - UFO MATTERS

DPSI

1. It appears that this file is being used for 'policy' and 'action' material, and that some of the papers would be more appropriately filed on 550-1-1.

2. In this regard, would you please examine this file and advise what remedial action, if any, should be taken. If all the papers on this file are to remain it will be necessary to change the title to read something like, 'INVESTIGATIONS INTO FLYING SAUCERS, POLICY AND ACTION'.

3. Forwarded for your advice.

ANNIANDE, N.A. 5000

Dear Sir,

UNIDENTIFIED FLYING OBJECT SYMPOSIUM

It is regretted that it will not be possible for a member of the Department of Air to attend the symposium on the topic of 'The Unidentified Flying Object Problem' to be held on 30th October, 1971. It is hoped, however, that the following information may be useful to your society during discussions.

There is no evidence that U.F.O.s have landed in Australia or, in fact, anywhere on earth. Naturally, however, the Department of Air is concerned with any possible threat to Australian security and in that context all reported sightings of U.F.O.s are investigated by R.A.A.F. officers. When a sighting is reported to the R.A.A.F. an officer from the nearest R.A.A.F. unit interviews the person making the report. The interviewing officer records all pertinent details on a proforma which is subsequently forwarded to the Department of Air where it is processed and summarised. Summaries are held by the Director of Public Relations who will provide them to members of the public on request. The summary of sightings is at present being brought up to date, and a copy will be forwarded to you within the next few weeks.

You may or may not be aware that the United States until late 1969 had a team of scientists investigating the possible presence of U.F.O.s in the American region. Under the direction of Dr. Edward Condon, the University of Colorado carried out an exhaustive study. Their report concluded that little if anything had come from the study of U.F.O. reports over a period of 20 years and that further extensive study was not justified. The findings of this investigation were published by Bantam books in a paperback titled 'The Condon Report'.

Attached hereto for your use is a summary of an address given by Mr. B.J. Roberts, a member of the Department of Air, to the Ballarat Astronomical Society at Ballarat in 1965. It is hoped that it will be of value in your discussions.

Yours faithfully,

DPR Have an up to date copy been sent yet? + file?

MINUTE PAPER

(This side only to be written on)

554/1/30

Subject: UNIDENTIFIED FLYING OBJECTS

DAFI

1. I agree that a member of this Department should not attend this symposium. I also consider that the suggestion by S Air SS as a footnote to folio 44, that a description of our method of processing reports be provided in lieu of a speaker, should be adopted. We might also include reference to our interest in unidentified flying objects and the limit of this interest. A reference to the Condon report would also be appropriate.

2. Would you prepare an appropriate paper for forwarding to the Association in due course. If you agree I will inform the Association accordingly.

1. ACK 19/4
2. DAFI

Dear Sir,

The Committee of the South Australian Division of ANZAAS is convening a one day symposium on the topic of " The Unidentified Flying Object Problem".

It is our feeling that there is a certain amount of unhealthy speculation on this subject which tends towards belief in obstruction by scientists and officials and an almost religious attitude.

Our aim is to look at the field and include the hypothesis that these phenomena are related to extra terrestrial life forms and examine this from a number of scientific view points.

As an introduction a representative of a U.F.O. organisation will speak. We then hope that a spokesman for the Department of Air would explain the processing of reports. This approach would repute, in the eyes of the public, the idea of deliberate suppression by officials of such reports.

I would be grateful if you could arrange for a member of your department to address our symposium on this topic. The period of the talk would be 25 minutes with the option of joining a panel to discuss audience questions at the end of the day. The date of the symposium is the 30th October, 1971.

BHH/RE.

AUSTRALIAN AND NEW ZEALAND ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE INC.
SOUTH AUSTRALIAN DIVISION —established as a Committee 1888, as a Division in 1968 and
incorporated as ANZAAS—SA in 1970. Telephone: 23 3636 Telegrams: AUSTSCIENCE—ADELAIDE

During a recent discussion program with listeners participation on a commerical radio station in Adelaide , the station switch board was jammed one minute after opening and remained so for the one hour duration of the program.

The topic discussed, which produced such interest, was Unidentified Flying Objects. The listeners contributions ranged from a personal report of sighting to statements of disbelief. Explanations of the sightings by a physicist on the program in terms of physical phenomena were more educated guesses than sound science. The basic reason for this is that few persons with scientific training are willing to consider the problem seriously, thus when the topic is discussed with the public, which is definitely interested, scientists appear unknowing and disinterested.

The Committee of the South Australian Division of ANZAAS felt that such an image does very little for the scientific community and, in accord with the general aims of ANZAAS, has decided to convene a one day symposium titled " The Unidentified Flying Object Problem ", to be held in Adelaide on October 30th 1971.

<u>The form planned for the symposium is as follows</u>.

(a) A statement of reported sightings by a senior member of the " Flying Saucer Research Group".

(b) A coverage of the treatment of such reports by official bodies given by a responsible member of such an organisation.

(c) A reasonably detailed discussion of the various physical phenomena usually described loosely by non specialists in a number of published explanations.

(d) In view of a largely held belief UFO's are extra terrestrial observers examinations of this hypothesis should be considered. The first topic suggested is a study of compatibility of the form of sightings with known satellite observation techniques and foreseeable developments in this field.

(e) If UFO's are extra terrestrial, where is their place of origin ? What are the chances of there being other planetary systems in the galaxy ; e.g. are there theories relating to the angular momentum of stars ; and the possible existence of planets. What range of radiation fields, temperature conditions atmospheres could be expected.

(f) If other planetary systems exist what conditions would support molecular structures of the complexity necessary for a sentient being capable of constructing surveillence vehicles. What atoms have properties capable of forming complex molecules. Are there example of such structures. What is probable form of extra terrestrial being ? How long would it take to develop ? Is there a limit to the period that such a species would remain viable.

(g) Given hypothetical distributions of possible planetary systems in the Galaxy and hypothetical development and stable periods for a species what are the chances of space-time coincidence of two space capable technologies with forseeable and conceptually possible transport systems.

(h) A final paper by a recognised scientist who regards the whole problem as real and worthy of serious attention by the scientific community in view of the observational material available and the often undermanned investigation of this material.

(i) A period in which some or all the speakers form a panel to comment on points brought out in audience participation discussion.

OPERATIONAL COMMAND

AIR STAFF INSTRUCTION NO 3/A/5

INTELLIGENCE - REPORTS ON UNUSUAL AERIAL SIGHTINGS

INFORMATION

1. Many persons throughout the world have reported seeing unusual objects in the air; these are referred to as unusual aerial sightings (more generally referred to as unidentified flying objects (UFOs)). Careful investigation of reports received by intelligence authorities in the UNITED KINGDOM, AUSTRALIA and the UNITED STATES has shown that most of the incidents can be positively attributed to definite causes. However no explanation has been found for some of the unusual aerial sightings.

2. The Royal Australian Air Force has been made responsible for the investigation of reports on unusual aerial sightings in AUSTRALIA and her Trust Territories because it is considered that the authority best suited to investigate a UFO is the nearest RAAF Base (except in the case of reports in WESTERN AUSTRALIA above latitude 23° South, excluding NORTH WEST CAPE when RAAF Base DARWIN is to investigate), where weather conditions, natural phenomena and aircraft movements are well known. The main purpose of such an investigation is to establish if the subject of any report poses a threat to the security of AUSTRALIA. To determine whether a threat might exist (from a [illegible] unknown and unidentified source) requires that all reports of unusual aerial sightings which can be positively identified are first eliminated, and that the remainder receive the most careful examination and appraisal.

3. This instruction outlines the action to be taken when reports are made about unusual aerial sightings.

EXECUTION

4. Persons who sight unusual aerial objects report the incident to some authority (eg. the police, the RAAF, civil aviation agencies, the press): the report is usually by telephone.

5. Commanders are to ensure that when any person makes such a report to a RAAF unit:

a. an officer obtains the leading particulars about the sighting (including name and address of observer);

b. an intelligence signal giving these particulars (and the cause of the sighting if it is definitely known) is immediately dispatched to the Department of Air and Headquarters Operational Command;

c. an officer interviews the observer so as to obtain the maximum amount of first-hand information;

d. that this officer completes Part 1 of the form at the Annex: (handwriting is acceptable);

e. an officer makes a full local evaluation of the incident, and completes Part 2 of the form at the Annex: (handwriting is acceptable); and

f. two copies of the form are dispatched to Headquarters Operational Command (within 48 hours of receiving the report if at all feasible). A covering letter is not necessary.

6. The above procedure is also applicable to sightings which are not reported directly to a RAAF unit: when such incidents become known, the nearest RAAF unit is responsible for taking the action outlined at paragraph 5.

7. If the observer is remote from the RAAF unit, or if the initial report clearly suggests that little would be gained by compliance with sub-paras 5 c and 6, commanders should endeavour to arrange for some responsible local person (e.g. a police officer or member of the other Services) to complete Part 1 of the form.

8. Commanders are to ensure that no member makes any statement to the press or the public about any aspect of an unusual aerial [illegible] report received, the progress of any investigation or the [illegible] assessment of the source. Persons requesting information should be referred to the Department of Air, Directorate of Public Relations.

Annex: - Investigation - Report of Aerial Object Observed

REPORT ON UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form)

1. Name of observer ..... Age .....
2. Address of observer .....
   ..... Phone.....
3. Occupation of observer .....
4. Date and time of start of observation .....
   How certain is the date? .....
   How accurate is the time of start .....
5. Duration of observation .....
   How accurate is your estimate? .....
6. Observer's location at time of sighting.....
   .....
   How familiar is observer with this locality?.....
   .....
7. Weather conditions at time of observation.....
   .....
8. Describe any aids/equipment used in the observation
   .....
9. Where was object first observed? :
   (a) Relative to your surroundings .....
   .....
   (b) Angle of elevation .....
   (c) compass angle bearing .....
   (d) how accurate are these estimates .....
10. What first attracted observer's attention? .....
   .....

11. If there was more than one light/object:

    (a) how many were there? .....

    (b) in what formation were they? .....

12. What was the colour of the light or object?.....

13. What was the brightness? (compare with full moon or common light source at a stated distance, eg. ordinary street light at 100 yards).....

14. What was the apparent size at nearest approach:

    (a) relative to Venus or Moon .....

    (b) relative dimensions in inches at arm's length (about 20 inches from the eyes) .....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?

    .....

16. Was any method of propulsion obvious? .....

17. Describe any sound heard, including changes in pitch and intensity .....

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?

    .....

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances .....

    .....

20. Give duration of any stationary phases .....

21. Describe any deviations or manoeuvres .....

22. Describe any trail of exhaust, vapour or light seen

    .....

23. Where was object last observed? :

    (a) relative to your surroundings .....

    (b) angle of elevation .....

(c) compass angle bearing.....

24. What was the manner of its disappearance?.....

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity, etc)?

.....

.....

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity .....

27. How many witnesses to the sighting? .....

28. Do you know of witnesses to similar sightings in the area?.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation? .....

30. What are your main reasons for excluding this explanation? .....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

F 53 A

1. Attached as requested by Reference A above is a copy of the Royal Australian Air Force Questionnaire used for the reporting and investigating of unusual aerial sightings for onforwarding the Australian Embassy at Buenos Aires.

2. When a sighting is reported to the authorities the nearest Air Force Base sends copies of the questionnaires to the persons concerned. If practicable an Air Force Officer interviews these persons and helps the observers complete part one of the questionnaire. When Part One has been completed and returned the investigating officer completes Part Two.

3. The complete Questionnaire is forwarded to the Department of Air where it is processed and summarised and a possible course of action determined. The forms are then filed and a summary of the information is passed to the Public Relations Officer of this Department from where it is freely available to the public.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
13 Nov 68	Time 1320 hrs. Duration 53 minutes. Astar contact tracked by automatic radar. Travelled towards RAAF Darwin, NT and then veered S.W. at 17-25 kts. No visual sighting.	Flock of birds
25 Nov 68	Object embedded in ground at Normanton, Qld.	Part of Satellite
26 Nov 68	Time 2030 hrs. Duration 5-10 minutes. Luminous pink sphere moving east then S.E. Surrounded by aura of red and green at Coburg, Vic.	Met balloon
30 Nov 68	Time 2200 hrs. Duration 4-5 minutes. Large deep yellow light moved slowly and intermittently towards observer then veered south at Evandale, Tas.	Met balloon
About 11 Aug 68	Time about 1415 hrs. Duration unknown. Silver object, photographed, but very indistinct blur only at Tamworth, NSW.	Falsified photograph
4 Nov 68 to 30 Dec 68	Noises at varying times but in defined patterns, travelling 140°/320° & reverse at Telefomen at Balgain, TPNG	Aircraft
5 Dec 68	Time Approx. 2000 hrs. Duration 8-10 minutes. Bright yellow light with tail, W to E, speed similar to jet aircraft at Swansea, NSW.	Space debris
7 Dec 68	Time approx. 1940 hrs. Duration approx 3-4 minutes Bright light with V tail Azimuth 70° in 3 to 4 minutes, W to E in straight path at Stanthorpe, Qld.	Satellite or rocket case on re-entry
7 Dec 68	Time 1940 hrs. Duration unknown. Bright dot with long tail travelling W to E, no sound at Stanthorpe, Qld.	Meteorite
11 Dec 68	Two reports - one at 1945 for one second and one at 2004 for 15 seconds. Both bright-ball explosions similar to flare, leaving persistant smoke trail at Melbourne, Vic.	Meteorite shower
11 Dec 68	Time 2015 hrs. Duration approx 30 seconds. Weather clear moonless, large orange round light 200-300 ft above ground, E to W, silent, slow speed at Newcastle, NSW.	Balloon
26 Dec 68	Time 2105 hrs. Duration 10 seconds 4/8 low cloud. Two bright circular lights on parallel course. 70° elevation above horizon at 2000' - 4000'. NE to SW at Manly Vale, NSW.	Aircraft
26 Dec 68	Time 2105 hrs. Duration 10 seconds. Two bright circular lights approaching from NE at 70° elevation. Appeared faster than commercial jet at Manly, NSW.	Aircraft
27 Dec 68	Time 2030 hrs. Duration for, 20 minutes, weather clear, dark cloud to S. Spherical brilliant-lit object moving slowly E to W.	Comet

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, C.S.I.R.O., and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial sighting	Possible Cause
27 Dec 68	Time 0503 hrs. Duration 2-3 minutes. Weather fine. Star-like light moving slowly in curved path at Launceston, Tas.	Satellite
29 Dec 68	14 reports 0008 to 0020 hrs. Duration varying. Lights in formation. Very high, travelling NE at Melbourne/Yarrawonga area.	Meteorite shower
29 Dec 68	Time midnight to 0015 hrs. Three reported sightings. Group of yellowish objects with bright tails travelling in S to NE direction. No sound or means of propulsion at Melbourne, Vic.	Meteorite shower
2 Jan 69	Time 2145-2200 hrs. Duration 15 minutes, weather fine. Light object moving to S at Mildura, SA	Pegasus I Satellite
16 Jan 69	U.F.O. sighting by crew of commercial airliner between Singapore & Darwin.	Being investigated
18 Jan 69	Time 2345 hrs. Duration 5-10 minutes, sky clear. Commercial airline pilots at 35,000' saw slowly descending light, changing white to yellow from level to 2° below aircraft 260° to 265° Between Singapore and Darwin.	Saturn
20 Jan 69	Time about 2020 hrs. Duration 2 minutes, weather clear. Cigar-shaped object separating from circular silver object. Flashing red light at Artarmon, NSW.	Aircraft
31 Jan 69 to 8 Feb 69	Times 0300 hrs 31 Jan, 1300 hrs 8 Feb. Noise heard by natives at West Sepik (PNG).	Aircraft
1 Feb 69	Time 2245 hrs. Duration 30 minutes, weather clear. Star-like object, stationary, then moved very high, very fast to S at Melbourne, Vic.	Combination of Echo II and star
3 Feb 69	Time 2145 hrs. Duration 10 seconds, weather clear. Roaring wing shaped object, S to N at Marion, SA	Aircraft
4 Feb 69	Time 2200 hrs. Duration 5-7 minutes, weather clear Noise from cigar shaped object with lights at Mitchell Park, SA.	Aircraft
5 Feb 69	Time 2350 hrs. Duration 2-3 minutes, weather clear. Like satellite at Melbourne, Vic.	Echo II
5 Feb 69	Time unknown. Duration 1 hr, bright light size of medium star, moving about. Observer, a member of U.F.O. organisation then went to sleep. At 40 miles NE of Hawker, SA.	Insufficient evidence
6 Feb 69	Time 2030 hrs. Duration 5 seconds, weather clear. Solid object, cigar shaped with red and white lights travelling NW to SE at Forrestville, SA.	Aircraft
9 Feb 69	Time 1500 hrs. Duration 3 hrs plus. White spherical object 45° above horizon moving very slowly N to S then N at Wulkuraka, Qld.	Venus

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
12 Feb 69	Time 2315 hrs. Duration 5-10 minutes, weather cloudy. Two objects, one bright green and one flashing. At Melbourne, Vic.	Aircraft
15 Feb 69	Time 2045 hrs. Duration 5-10 minutes, weather fine. Big bright star, moving NW to SE at Sandi, NSW.	Echo II Satellite
17 Feb 69	Time 0250 hrs. Duration 25 minutes, weather clear moonless. Observer attracted by noise than saw solid object and humanoid form walking around and heard morse code, at Flinders Park, SA.	Investigation has found no supporting evidence.
18 Feb 69	Time 2305 hrs. Duration 25 minutes, weather clear. An object with changing red to white light occasionally stopped, moved S to N. Viewed from moving car at Melbourne, Vic.	Aircraft
21 Feb 69	Time 2125/2130 hrs. Duration 15 seconds, weather slight overcast. Ball moving quickly at Melbourne, Vic.	Meteorite
23 Feb 69	Time 2030 hrs. Duration 30 minutes, weather becoming cloudy. Three objects, one brilliant white. At Melbourne, Vic.	Combination of Echo II and aircraft.
23 Feb 69	Circle of "scorched" grass, burnt and squashed toadstools, at Kyogle, NSW.	Toadstool "Ring Phenomenon"
23 Feb 69	Time unknown. Duration a matter of seconds. Very bright star moving E then SE at Wallsend, NSW.	Insufficient evidence, probable satellite
27 Feb 69	Time 0350 hrs. Duration 10 minutes, mainly rain. Noise similar to aircraft, moving W at Aitape, TPNG.	Aircraft
5 Mar 69	Time about 0315 hrs. Duration 15 seconds, cloudy. Burning object, red/orange, moving N to W with trail of smoke at Maryville, NSW.	Meteor
7 Mar 69	Time 2045 hrs. Duration 2 minutes, cloudy but clear. Brilliant yellow light, appeared like aircraft landing light, at Darwin, NT.	Moon "halo" phenomenon, reflected on low cloud.
11 Mar 69	Time 2100 hrs. Duration 2-3 minutes, cloudy but clear. Yellow lights in formation, quite high at Darwin, NT.	Moon "halo" effect
16 Mar 69	Unidentified aircraft heard by natives at 1030 hrs on 9th & 16th Mar., at Genepa, TPNG.	RAAF aircraft
17 Mar 69	Time 1935 hrs. Duration 3 minutes, weather fine. Moving light, changing red to orange and moving W to E at Launceston, Tas.	Satellite

The Secretary,
Department of External Affairs,
CANBERRA A.C.T.

R.A.A.F. Questionnaire on unidentified flying objects.

We have received a request from an Argentine journalist for a copy of a Royal Australian Air Force questionnaire on unidentified flying objects.

The journalist who claims to write for a number of science fiction magazines reports that he read of the questionnaire in a book by Henry Durrant titled "Le livre noir des Soucoupes Volantes".

If this questionnaire exists we would be grateful if you could forward a copy.

Dear Sirs,

With reference to your letter of 6th June, 1970 it is advised that all reports relating to this sighting have been checked and there is no evidence to substantiate the statements submitted by you.

However it is advised that a sighting reported as 'a white spherical object' was made on 15th July, 1965 by a number of people, including Department of Civil Aviation officials, who were on duty at RAAF Base, Fairbairn. While the sighting could not positively be identified it is believed there are several possible explanations.

Firstly, the sighting could have been caused by the non-persistent condensation trail of a high-flying jet aircraft.

Alternatively, the sighting could have been caused by the planet Venus whose position approximated the direction of the sighting at the time.

A third possible explanation is that the sighting could have been caused by a high altitude radar reflecting meteorological balloon used in wind forecasting and prediction. These balloons are sent to a high altitude and are visible from considerable heights under favourable conditions.

Further more, due to the varying moisture content in the air close to the ground, they often appear very furry or have a "halo-like" appearance giving a very distorted effect. They may also change colour. These balloons are used by the meteorological authorities in the general area and a number are periodically released from Wagga Wagga, NSW. On occasions under the influence of strong winds, they travel considerable distances.

The visibility at the time of the reported sighting was extremely clear with no cloud and the fact, that the phenomena suddenly disappeared could be explained by the fact that these meteorological balloons normally burst at varying altitudes.

It is hoped that the foregoing information will assist you in your research into the incident to which you refer.

Yours faithfully,

(Sgd.) F.J. Green

(F.J. GREEN)
Secretary

MINISTERIAL PRESS RELEASE

FRIDAY 30th JULY, 1965

RAAF PR 8/1907/65

STATEMENT BY THE HONOURABLE PETER NIXSON, MP, MINISTER FOR AIR

RAAF REPORT ON SIGHTING OF FLYING OBJECT

The RAAF today released the following information on the reported sighting of a flying object in the Canberra area on 15th July last.

The sighting was made by a number of people, including Department of Civil Aviation officials, who were on duty at RAAF Base, Fairbairn.

The RAAF said that while the sighting could not positively be identified, its investigators believed there were several possible explanations.

Firstly, the sighting could have been caused by the non-persistent condensation trail of a high-flying jet aircraft.

Alternatively, the sighting could have been caused by the planet Venus which is clearly visible during the day under some conditions and whose position approximated the direction of the sighting at the time.

A third possible explanation offered was that the sighting could have been caused by a high altitude radar reflecting meteorological balloon used in weather forecasting and prediction.

These balloons which are hydrogen filled, are sent to a high altitude and are clearly visible from long distances due to the reflecting sunlight.

Furthermore, due to the varying moisture content in the air close to the ground, they often appear very furry, or have a "halo-like" appearance giving a very distorted effect. They may also change colour. These balloons are in use by the meteorological authorities in the general area and a number are periodically released from Wagga NSW. On occasions under the influence of strong winds, they have been known to travel considerable distances.

The visibility at the time of the reported sighting was extremely clear, with no cloud and the fact that the phenomena suddenly disappeared, could be explained by the fact that the meteorological balloons normally burst at varying altitudes.

The RAAF said that as announced previously the service receives a considerable number of reports of unidentified objects from all sections of the community and all these reports are investigated.

On many occasions they have turned out to be weather balloons, high-flying aircraft, satellites, stars and meteors to mention a few, and over the last few years, only three or four per-cent of sightings could not be satisfactorily explained.

5006

Dear Sir,

On behalf of interested parties I am enquiring about an incident which is alleged to have taken place at Canberra Airport, at 10:30 pm. on July 15th of this. I realize this may require some work on your part but we would much appreciate your being able to refute or affirm these statements concerning the above date:

1. A flaming object hovered near the airport, suspended at about 5000' for approximately 40 minutes.
2. An Air Force plane was sent out to identify it but it moved out of sight at high speed.

These statements are derived from a book FLYING SAUCERS, written by Coral E. Lorenzen. We are also delving into records of newspapers, more for the sake of winning an argument, than proving a "fact."

Thank you for your time and trouble.

Yours sincerely,
B Evans

AIR FORCE TO TERMINATE
PROJECT "BLUE BOOK"

Air Attache
SO Lee

Secretary of the Air Force Robert C. Seamans, Jr., announced today the termination of Project Blue Book, the Air Force program for the investigation of unidentified flying objects (UFOs).

In a memorandum to Air Force Chief of Staff General John D. Ryan, Secretary Seamans stated that "the continuation of Project Blue Book cannot be justified either on the ground of national security or in the interest of science," and concluded that the project does not merit future expenditures of resources.

The decision to discontinue UFO investigations was based on:

- An evaluation of a report prepared by the University of Colorado entitled, "Scientific Study of Unidentified Flying Objects."

- A review of the University of Colorado's report by the National Academy of Sciences.

- Past UFO studies.

- Air Force experience investigating UFO reports during the past two decades.

Under the direction of Dr. Edward U. Condon, the University of Colorado completed an 18-month contracted study of UFOs and its report was released to the public in January, 1969. The report concluded that little if anything has come from the study of UFOs in the past 21 years that has added to scientific knowledge, and that further extensive study of UFO sightings is not justified in the expectation that science will be advanced.

The University of Colorado report also states that, "It seems that only so much attention to the subject (UFOs) should be give as the Department of Defense deems to be necessary strictly from a defense point of view....It is our impression that the defense function could be performed within the framework established for intelligence and surveillance operations without the continuance of a special unit such as Project Blue Book, but this is a question for defense specialists rather than research scientists."

A panel of the National Academy of Sciences made an independent assessment of the scope, methodology, and findings of the University of

MORE

Colorado study. The panel concurred in the University of Colorado's recommendation that "no high priority in UFO investigations is warranted by data of the past two decades." It concluded by stating that, "On the basis of present knowledge, the least likely explanation of UFOs is the hypothesis of extraterrestrial visitations by intelligent beings."

Past UFO studies include one conducted by a Scientific Advisory Panel of UFOs in January, 1953 (Robertson Panel); and, a review of Project Blue Book by the Air Force Scientific Advisory Board Ad Hoc Committee, February-March, 1966 (Dr. Brian O'Brien, Chairman). These studies concluded that no evidence has been found that any of the UFO reports reflect a threat to our national security.

As a result of investigating UFO reports since 1948, the conclusions of Project Blue Book are: (1) no UFO reported, investigated, and evaluated by the Air Force has ever given any indication of threat to our national security; (2) there has been no evidence submitted or discovered by the Air Force that sightings categorized as "unidentified" represent technological developments or principles beyond the range of present-day scientific knowledge; and (3) there has been no evidence indicating that sightings categorized as "unidentified" are extraterrestrial vehicles.

Project Blue Book records will be retired to the USAF Archives, Maxwell Air Force Base, Alabama. Requests for information will continue to be handled by the Secretary of the Air Force, Office of Information (SAFOI), Washington, D.C. 20330.

DPI (FOI2)

1. Enclosed is a letter from Herbert H. Taylor of New York USA, requesting information on UFO sightings during 1959.

2. In reply to Mr Taylor could you inform him that the RAAF could come to no definite conclusion, and that enquiries with the United Kingdom and the United States could add no clues or answers. As a result these sightings have been classified as Aerial phenomenon of unknown origin but most probably they were reflections on cloud of a major light source of unknown origin.

3. Also enclosed is a copy of a letter from Mr D.G. Guyatt, Essex, UK thanking us for our letter of 19 Nov 69.

Gentlemen:

On June 26 and 27, 1959, many witnesses observed a UFO at Boianai, Papua, New Guinea. The many witnesses on both nights included an Anglican Priest, Father William Gill. The object was a clearly defined disc with a superstructure on top. On both nights, the numerous witnesses observed human-like figures on top of the object. Would you kindly inform me as to the official evaluation of these two extraordinary UFO reports?

Dear Sir,

re: in reply quote: 6/Air (42).

As you stated in your letter, dated at 7th. July, 1969 that you have read my diagram, photograph and slide to Department of Air Canberra, A.C.T. and if I not receive acknowledgement within a few weeks you would be pleased if I write to you again.

Because I had to come here to above address for business and my Kalgoorlie address given up I did not received any information yet. Shortly I believe the mower is in Kalgoorlie, but the people who live there now are not post it to me. So the best to do is to write to you as you suggested it.

If you would know something about the matter I would be glade if you would write to me again. I would definitely like to have the photo and slide back soon as possible because I do not think any body are got a good photo like mine

Sorry to bother you with it but it is important to me to have them back.

Yours truly,

Doris Rich

UNIDENTIFIED FLYING OBJECTS

Dear Sir,

1. Your letter of 12th October, 1969 detailed a number of questions on the subject of 'Unidentified Flying Objects' (UFO's).

2. There is no substantiated proof that UFO's have landed in Australia, or in fact, anywhere on Earth. My Department is concerned with any possible threat to Australian security, and in that context reported sightings of UFO's are investigated by the Royal Australian Air Force. Much time and effort is devoted each year to the assessment of reported aerial sightings but these assessment procedures do not extend to detailed scientific investigation.

3. It is of interest to note that the United States, until recently, had a team of scientists investigating the probable presence of UFO's in America. The study, which was lead by Dr Edward Condon was closed last year and the findings of the team were published by Bantam Books in a paperback titled 'The Condon Report'.

4. This report contends that there is nothing of an inter-planetary nature occupying American airspace. If, however, you firmly believe in life forms being existent on planets other than Earth, it is possible to believe that these life forms have technology permitting their inter-planetary movement.

5. The space explorations of the United States of America and the Union of Soviet Socialist Republics have not found anything to support the theory of life on planets in our solar system. It seems that the Mariner series of space exploration to Mars have found that it is a 'dead' planet. The only other source of extra-terrestrial life then would have to be in another 'solar system'. Unless these life forms have the technology to traverse the dimension of time then they would never be able to make a journey to this planet. Evidence thus indicates that while it is possible for extra-terrestrial life forms to visit Earth, it is extremely improbable.

6. The Australian Government is not secretive about UFO's, and a summary of all reported sightings between January 1960 and November 1968 has been

/prepared

prepared by the Directorate of Public Relations, Department of Air. A copy of this summary has been dispatched to you under separate cover.

SUBJECT: UNIDENTIFIED FLYING OBJECTS

Exec D Air

1. In answer to question 4 of Mr D.G. Quyatt, Benfleet, England something on the following lines may be used.

2. The Condon report contends that there is nothing of an extra-terrestrial nature invading American airspace. If however you are a firm believer in life forms being existent on planets, other than earth, then it is possible to believe that these life forms have the technology capable of inter-planetary movement.

3. The space explorations of the United States of America and the Union of Soviet Socialist Republics have not found anything to support the theory of life on planets in our solar system. In fact the only planet which scientists believe could support life forms is the planet Mars, and it seems that the mariner series of space explorations to Mars have found that it is another "dead" planet.

4. The only other source of extra-terrestrial life would have to be in another "solar system". Unless these life forms have the technology to traverse the dimension of time then they would never be able to make a journey to this planet.

5. From the above evidence it appears that yes, it is possible for extra-terrestrial life forms to visit earth, but it is highly improbable.

Dear Mr. Peck,

I refer to your recent letter concerning reported sightings and photography of 'Unidentified Flying Objects'.

There is no substantiated proof that U.F.O.'s have landed in Australia, or in fact, anywhere on Earth. My Department is concerned with any possible threat to Australian security, and in that context reported sightings of U.F.O.'s are investigated by the Royal Australian Air Force. Much time and effort is devoted each year to the assessment of reported aerial sightings but these assessment procedures do not extend to detailed scientific investigation.

It is of interest to note that the United States, until recently, had a team of scientists investigating the possible presence of U.F.O.'s in America. The study, which was lead by Dr. Edward Condon was closed last year and the findings of the team were published by Bantam Books in a paperback titled "The Condon Report". This report contends that there is nothing of an inter-planetary nature occuring American airspace.

The Australian Government is not secretive about U.F.O.'s as summaries of all reported sightings with their probable cause are readily available from the Directorate of Public Relations, Department of Air, Canberra, A.C.T. 2600. A summary of all reported sightings between January 1960 and November 1968 is attached for your information.

Dear Sir, Unidentified Flying Objects (UFO)

I am writing with regard to the above mentioned subject, and should be gratefull if you would kindly advise the answers of the following questions, and also supply any relavent information which is of an unclassified nature.

1. Are UFO's considered by your goverment to :- Exist/ not exist. if they are considered to exist, are they taken as a serious phenomen.

2. Does the Royal Australian Air Force investigate such reports considered to be UFO's

3. Is there any proof to substantiate the existance of U.F.O.'s.

4. If the above questions are considered in a positive manner, does the Extra Terrestial theory seem possible.

5. Are reports received by yourselves or an similar authority, pertaining to UFO's Classified, Secret, or any other such procedure.

6. If question five (5) is considered in a negative manner, would you furnish me with as much information as possible.

I await your early reply, and thank you for your help in this matter.

29 OCT 1969

UFO INVESTIGATION IN THE RAAF

Research into this subject has come up with some unrewarding answers, firstly the inquiry can not go back any further than the 11th November 1953. The cause of this blockage is the loss of Part 1 of file 114/1/197 (ex SSC CDS/2) in the move of the Department from Melbourne to Canberra. Two searches through records and the archives have failed to trace this file. One search was carried out in March 1966 and the other on 15th and 16th July 1969. As the first UFO report was received in America in July 1947, there would be up to six years of correspondence dealing with UFOs unaccounted for.

A further hinderance was the reference to four different files dealing with UFO policy, however after rationalisation of the files in 1966 there is now only one file on this subject (554/1/30).

In dealing with the policy it will be divided into three sections: Australian Government Policy; RAAF Policy with regards to the investigation; Overseas observations. A special section will deal with an investigation carried out by Mr C. H. Turner in 1954.

Australian Government Policy

The first recorded statement by Government minister was by the Minister for External Affairs. There is no statement of policy as such, but it suggests a connection between UFO sightings and periods of intense meteorite activity (ANNEX "A").

In April 1954 the DCAS approved the official policy that there had not been enough evidence collected to make a conclusion (ANNEX "B").

In answer to questions from "World Wide Magazine" in November 1957, the RAAF officially acknowledged a "wait and see" policy (ANNEX "C").

In March 1963 the Minister for Air (Mr Osborne) made a statement in the House that there was no evidence to verify that "interlopers ..... have been visiting us" (ANNEX "D").

This is the last statement on record by a Government official on the attitude of the Australian Government, so the present situation has arisen whereby there is no definite policy, but a "wait and see attitude" is held, with the reservation that there has been no evidence as yet to confirm the presence of "flying saucers".

RAAF Investigation Policy

Folio 3 of 554/1/30 Part 1 (ex folio 7 of 114/1/197 Part 2) dated 15th November 1953 is the first record of a letter to Commands concerning UFOs. The letter suggests improvements to the report forms used, so there was undoubtedly a previous directive to Commands on their responsibilities. Whether this was written or verbal is not known. According to a minute (ANNEX "E") dated February 1966, there were no written responsibilities for Operational Command in the UFO field, and after much discussion a directive was issued to both Commands in March 1966 (ANNEX "F"). Paragraphs 6 and 7 deal with Base responsibilities.

Since that date there have been numerous reminders of Command and Base responsibilities.

The release of information to the public was not allowed until 1966, when there was a ministerial statement authorizing the release. In April 1966 the first "Summary of Unidentified Aerial Sightings Reported to Department of Air" was compiled. This dated back to January 1960. Since then there have been periodic releases updating the Summary. These are available to any person.

It seems therefore that the RAAF has definite policies on collection and release of all information pertaining to UFOs.

Overseas Observations

In America, the USAF set up "Project Blue Book" soon after the first sightings in 1947. This project keeps files on and investigates all reported sightings. In the United Kingdom a similar office was formed and still operates, although it is not as well known as the American project.

From time to time releases have been made to Australia by both these offices and some of them are attached (ANNEX "G").

In 1966 the United States Government set up an official inquiry into the problem. A team led by Dr Condon spent two years processing and investingating reports held in "Project Blue Book". They published the report in 1968 as a paperback Bantam book (copy held by DAFI but on loan to Mr C. H. Turner). The conclusion drawn by all these investigators is that as yet there is no corroborative evidence to suggest the presence of any unearthly beings. Only about 2% - 3% of reports are unexplainable by natural phenomenon, and these are usually due to lack of information. A copy of the Scientific Americans' book review of the Condon report is attached (ANNEX "H").

Mr C. H. Turner's Interests

In 1954, Mr C. H. Turner, then a member of the Physics Department of the Melbourne University, requested permission to do a study on UFOs in Australia. This permission was given and so Mr Turner carried out this study. His report is rather lengthy, but his conclusions and recommendations are attached. Mr Turner then left Australia for the United Kingdom. After his return to Australia he again approached DAFI from his new position in the Scientific Intelligence section of JIB. Permission was again given to him to investigate the UFO files (in late 1968). This permission was given unofficially by D/DAFI (Ops), with the Director's agreement. On Mr Turners suggestion a new report form was devised in May 1969, and forwarded to Commands. This form will give a more scientific slant to the reports.

Note should be made that the 1954 report was largely based on American information by a Major Keyhoe. This "Keyhoe" report has been proved to be an unofficial highly biased opinion written by an ex-Marine officer-turned-science-fiction-writer.

Mr Turner also disagrees with Dr Condon's findings.

All correspondence on this topic is attached at ANNEX "J".

28th January 1954

Dear Sir,

From time to time people report having seen unexplained objects in the sky which have come to be called "flying saucers". There have been many explanations of them - the sun shining on high flying aircraft - meteorological balloons - imagination, etc. There is another possibility that may account for some of them, which has not been suggested, so far as I know. On known dates in each year, the earth passes through meteor streams. These are the remains of meteors that have disintegrated in outer space, but which continue their original paths round the sun in the form of streams of solid particles and meteoric dust. The fact that the earth moves round the sun in a fixed path and that these debris of meteors also move round the sun in fixed paths, means that the paths of the earth and of some of these meteoric streams intersect each other on a number of dates which are the same each year. The earth sometimes takes a number of days to pass through the more important of these meteoric streams. The dates of maximum meteoric activity are - 1rd January, 21st April, 4th May, 8th June, 30th June, 28th July, 10-13th August, 10th October, 20-21rd October, 3-10th November, 14th November, 16th November, 11-13th December.

I have lists of the dates over the last several years on which people have reported having seen "flying saucers" in Australia, and have compared them with the dates on which the earth passes through the principal meteoric streams. There appears to be a noticeable relationship between these two sets of dates. By this I mean that there tends to be a grouping of flying saucer sightings round about the meteor-stream dates that it is hard to believe is by chance. And again, there is a relative absence of "flying saucer" reports during the principal gaps between meteor-stream dates. For instance, the minimum meteoric activity of the year is between January and April. These are also the months in which fewest "flying saucers" have been reported in Australia. I do not suggest that this evidence is by any means complete, or that it is, at best, more than a partial explanation of "flying saucer" phenomena. All that I suggest is that there is some evidence that people seem to report otherwise unexplained objects in the sky round about the dates on which the earth passes through the principal meteor-streams, and there seems to be a lull in the reporting of flying saucers in between these dates.

I do not suggest any more than that what I have said may be an explanation of at least a proportion of the "flying saucer" reports.

I am,
Yours very truly,

(R. G. CASEY)

The Editor,

ANNEX 'B'

7A 24A

DRAFT

Press Release 7A

INVESTIGATION OF FLYING SAUCERS

STATEMENT OF R.A.A.F. POLICY

[illegible]

1. The R.A.A.F. accepts reports on flying saucers and attempts an allocation of reliability. Those that fall in the reliable class are then subjected to further investigation as and when the opportunity occurs. As a result of this further investigation, a smaller number of reports are followed up and investigations are made with the Meteorological Services, the Government Astronomer and the Civil Aviation authorities in an attempt to fit the original occurrences in with any normal flying activity or meteorological phenomena.

2. As a result of investigations in the past, there is no doubt that reliable observers have reported sightings which today are inexplicable within the resources available to the R.A.A.F. Reports of this type are continuously filed in an attempt to develop sufficient depth of evidence for accurate analysis to be made. It may however, be several years before the required depth of evidence is available.

[illegible]

ANNEX C

REPLY TO QUESTIONNAIRE ON UNIDENTIFIED FLYING OBJECTS - WORLD WIDE MAGAZINE

dated 27 Nov 57

1. Q. What is the official attitude and policy of your Government in connection with so-called flying saucers?

A. At the time of the spate of flying saucers reports in 1952/54, the Australian Government adopted a 'wait and see' attitude. Reports on flying saucers from various parts of the world have been studied and local investigations have taken place. The Government has adopted the attitude that there is still insufficient evidence available to enable an accurate analysis to be made.

2. Q. The United States of America have a special commission which investigates reliable reports of unidentified flying objects. Has your Government a similar project in operation?

A. There have been insufficient reports of unidentified flying objects in Australia to warrant the formation of a special commission to investigate them. The Royal Australian Air Force accepts reports and attempts an allocation of reliability. Reports that fall in the reliable class are subjected to further ~~information~~ investigation as and when opportunity occurs. As a result of this further investigation a small number of reports are followed up and investigations are made with the Meteorological Service, the Government Astronomer and the Civil Aviation authorities in an attempt to fit the original occurrences in with any

554/1/30 (97)

6 MAR 1963

Dear Sir,

I refer to your letter dated 23rd January, 1963, regarding unidentified flying objects.

From time to time reports of unidentified flying objects are received and investigated by the Royal Australian Air Force, but details of individual investigations have not been made public.

On October 20th, 1960, the Minister for Air, the Honourable F.M. Osborne, made a statement in the Australian National Parliament at Canberra, summarizing the position, and his comments may be pertinent to your request.

In the course of his remarks Mr. Osborne said, "The Department of Air does obtain information about all well-reported cases of unidentified flying objects. Although reports of this sort have been investigated very carefully for some years, nearly all of them are explainable on a perfectly normal basis. Sometimes they are found to be weather balloons, high-flying aircraft, or even stars. On one occasion, it was established that a reported spaceship was the moon. Of all these reports, only three or four per cent cannot be explained on the basis of some natural phenomenon, and nothing that has arisen from that three or four per cent of unexplained cases gives any firm support for the belief that interlopers from other places in this world or outside it have been visiting us".

Yours faithfully,

(A. D. McFarlane)
SECRETARY

Mr. John Laval,
7 Idlewild Lane,
Matawan,
NEW JERSEY, USA.

DEPARTMENT OF AIR ANNEX 'E' 11

MINUTE PAPER

(This side only to be written on)

Subject: Unidentified Flying Objects

CONFIDENTIAL

D/DAPI (Ops)

1. Ref Folio 10

2. I have reviewed the current "Ad Hoc" system in the practice of processing U.F.O. reports and with minor criticisms it appears to be working satisfactorily, entailing the minimum of work by this Directorate.

3. However, in view of SO Intell (Opcom) objections of not having his responsibilities in writing and DAPI direction that he is to receive them it is obvious that we will have to do something. As a starting point your recommended statement contained at Folio 5A should be accepted for distribution as required.

4. The next point we should consider is the updating of the report proforma. I have drafted a new questionnaire which I feel will give a more complete picture of the incident and it is submitted for your consideration.

5. Furthermore, as well as advising Hqopcom on our recommended course of action we will also be required to include D.C.A. on distribution of the new directive to keep them in the picture.

Headquarters Operational Command RAAF [illegible] 1W N.S.W.

INVESTIGATION OF UNIDENTIFIED FLYING OBJECTS

1. The Royal Australian Air Force is responsible for the investigation of reports of unidentified flying objects (UFOs) in Australia and the Trust Territories. The purpose of this letter is to lay down the procedure for the handling and investigation of such reports.

2. The main purpose of the investigation of any UFO is to establish whether or not the subject of the report poses a threat to the security of Australia. The identification of the cause of the UFO report and its classifications as aircraft, balloon, missile, astronomical body or phenomena etc, is of minor importance and mainly for the benefit of members of the public whose interest may have been aroused by the report.

3. The handling and investigation of reports of UFOs is to be the responsibility of the AOC of the Command at whose base the UFO is reported. The investigation is to be based on a questionnaire which is shown at the annex and which is designed to record all necessary details of the observation and provide the information on which an investigation can be based.

4. The present arrangement for bringing to the attention of the RAAF a report of a UFO are widely known. Under the present scheme, anyone who sees, or thinks he sees an aerial object which he cannot identify contacts the nearest RAAF base, or civil airport and if this is impractical, his nearest police station. These arrangements are working satisfactorily and there is no intention to change them.

5. In a country as large as Australia, it is considered that the authority best suited to the investigation of a UFO is the nearest RAAF base, where local weather conditions, natural phenomena and aircraft movements are well known. This is the principle on which the procedure is to be based.

6. Air Officers Commanding are to ensure that as soon as possible after the report of a UFO is received the Base Commander sends a signal to Command Headquarters and Department of Air giving brief details of the observation and appoints a responsible officer, preferably of the General Duties Branch, to initiate inquiries. Normally this officer should interview the observer and complete the proforma. In cases where the remoteness of the area of observation would make this procedure impractical, or the Base Commander is satisfied from the initial inquiry that nothing would be gained by such a procedure, he should arrange for the proforma to be completed by or in the presence of a police officer or other responsible person.

.../2

7. When the completed proforma is received at the RAAF base, Officers Commanding are to ensure that an adequate examination of the report is carried out, bearing in mind the principles outlined in para 2 above. A brief report on the findings of the investigation along with a copy of the proforma should be despatched without undue delay to Command Headquarters. After consideration by the Air Officer Commanding, the UFO proforma and investigation findings are to be forwarded to Department of Air for filing and record purposes.

8. No attempts should be made to answer public enquiries at unit or command level. Requests by members of the public for information on UFOs in Australia and for the RAAF assessment of their origin etc should be referred to the Department of Air where they will be dealt with by the Directorate of Public Relations.

UNIDENTIFIED FLYING OBJECTS

Minister

1. The Directorate of Air Force Intelligence wrote to Air Ministry London, and to the Australian Joint Services Staff in Washington on 26th November 1959 for the latest views of the British and United States Governments on Unidentified Flying Objects. You may be interested in the replies received recently.

2. Air Ministry stated that specific questions have been asked in the House of Commons concerning individual sightings reported in the press. The Air Ministry has replied to questions as they have occurred and Parliament has not at any time debated the subject. All sighting reports occurring in the United Kingdom have been processed through Air Ministry Intelligence. On an average 90% of all sightings have been explained by a variety of causes ranging from meteorological balloons and meteors to aircraft lights. Air Ministry is confident that the other 10% only remain unexplained because of lack of reliable information.

3. The Defence Department in Washington stated that "over twelve years of investigating and evaluating unidentified flying object sightings has provided no evidence to confirm the existence of the popularly-termed "flying saucers", as interplanetary or interstellar space ships". During the period June 1947 and October 1958, 6,000 reports were investigated. More than 84% of the reported UFO sightings were definitely established as natural phenomena, hoaxes, birds, or man-made objects. Insufficient data was available to thoroughly analyze and evaluate 14% of the reports and less than 2% were classified as unknown. The investigations carried out during the last half of 1958 set a record low for the number of cases classified as "unknown" - .67%.

EXCERPTS FROM

PROJECT BLUE BOOK

SPECIAL REPORT NO. 14

(Analysis of Reports of Unidentified Aerial Objects)

Project No. 10073

5 May 1955

AIR TECHNICAL INTELLIGENCE CENTER

Wright-Patterson Air Force Base

Ohio

improved methods of investigation and reporting, and by scientific analysis, the number of unexplained cases has decreased rapidly towards the vanishing point.

Therefore, on the basis of this evaluation of the information, it is considered to be highly improbable that reports of unidentified aerial objects examined in this study represent observations of technological developments outside of the range of present-day scientific knowledge. It is emphasized that there has been a complete lack of any valid evidence of physical matter in any case of a reported unidentified aerial object.

* * * * *

CONCLUSIONS

It can never be absolutely proven that "flying saucers" do not exist. This would be true if the data obtained were to include complete scientific measurements of the attributes of each sighting, as well as complete and detailed descriptions of the objects sighted. It might be possible to demonstrate the existence of "flying saucers" with data of this type, IF they were to exist.

Although the reports considered in this study usually did not contain scientific measurements of the attributes of each sighting, it was possible to establish certain valid conclusions by the application of statistical methods in the treatment of the data. Scientifically evaluated and arranged, the data as a whole did not show any marked patterns or trends. The inaccuracies inherent in this type of data, in addition to the incompleteness of a large proportion of the reports, may have obscured any patterns or trends that otherwise would have been evident. This absence of indicative relationships necessitated an exhaustive study of selected facets of the data in order to draw any valid conclusions.

A critical examination of the distributions of the important characteristics of sightings, plus an intensive study of the sightings evaluated as UNKNOWN, led to the conclusion that a combination of factors, principally the reported maneuvers of the objects and the unavailability of supplemental data such as aircraft flight plans or balloon-launching records, resulted in the failure to identify as KNOWNS most of the reports of objects classified as UNKNOWNS.

An intensive study, aimed at finding a verified example of a "flying saucer" or at deriving a verified model or models of "flying saucers" (as defined on Page 1)[1], led to the conclusion that neither goal could be attained using the present data.

It is emphasized that there was a complete lack of any valid evidence consisting of physical matter in any case of a reported unidentified aerial object.

Thus, the probability that any of the UNKNOWNS considered in this study are "flying saucers" is concluded to be extremely small, since the most complete and reliable reports from the present data, when isolated and studied, conclusively failed to reveal even a rough model, and since the data as a whole failed to reveal any marked patterns or trends.

Therefore, on the basis of this evaluation of the information, it is considered to be highly improbable that any of the reports of unidentified aerial objects examined in this study represent observations of technological developments outside the range of present-day scientific knowledge.

---

1. In June, 1947, Kenneth Arnold, a Boise, Idaho, businessman and private pilot, publicly reported the now-famous sighting of a chainlike formation of disc-shaped objects near Mount Rainier, Washington. Resulting newspaper publicity of this incident caught the public interest, and, shortly thereafter, a rash of reports of unidentified aerial objects spawned the term "flying saucers". During the years since 1947, many reports of unidentified aerial objects have been received by the Air Force from many and diverse sources.

   The unfortunate term "flying saucer", or "flying disc", because of its widespread and indiscriminate use, requires definition. Many definitions have been offered, one of the best being that originated by Dr. J. Allen Hynek, Director of the Emerson McMillin Observatory of The Ohio State University, who has taken a scientific interest in the problem of unidentified aerial objects since 1949. Dr. Hynek's definition of the term is "any aerial phenomenon or sighting that remains unexplained to the viewer at least long enough for him to write a report about it" (Hynek, J. A., "Unusual Aerial Phenomena", Journal of the Optical Society of America, 43 (4), pp 311-314, April 1953). Dr. Hynek, elaborating on his definition, says, "Each flying saucer, so defined, has associated with it a probable lifetime. It wanders in the field of public inspection like an electron in a field of ions, until 'captured' by an explanation which puts an end to its existence as a 'flying saucer'".

The Condon report on unidentified flying objects, and other matters

by Philip Morrison

SCIENTIFIC STUDY OF UNIDENTIFIED FLYING OBJECTS, conducted by the University of Colorado under contract to the United States Air Force. Edward U. Condon, Scientific Director. Daniel S. Gillmor, Editor. Bantam Books ($1.95).

More than a decade ago the political complexities that are born of the fears and the strengths of a great nuclear power were made starkly clear in a thick Government document called *In the Matter of J. Robert Oppenheimer*. That work was needless of tragedy, its content and its impact were heated, even its form was austere, veiled, concentrated. Once again the reader is presented with a thick official volume of genuinely demonstrable interest, describing another unique episode of our times. This document, however, is diffuse, cheerful, cordial, deliberately instructive and unreservedly illustrated. It is not force but rather a high and human serenity, in a curious way the two documents overlap.

This report presents the work of able men, led by a wise physicist of high repute, who have tried to bring order in the chronicle, to make what sense they could out of rumor and hard data, out of cynical fraud and honest and conscientious observation. They have succeeded brilliantly, holding a unanimous to reason, to experiment and to intellectual patience, modesty and caution. The heart of their work is the careful study of about 90 unusual reports. These chief data are the accounts of eyewitnesses, their testimony is the tape recorder. The thrust of the work, however, is not psychological but physical. Each report is described, and a set of sensible hypotheses is tested against the data. Could the object have been a balloon? Then seek the data on upper air winds. Was a strong magnetic field used to stop an automobile? Then compare the magnetic pattern of the automobile body with that introduced into other cars subjected by the same process.

The most interesting cases are the ones that present photographic evidence. These have been analyzed with great penetration and elegance, mainly by William K. Hartmann, a planetary astronomer at the University of Arizona. About a quarter of the photographs show evidence of fabrication, a quarter are mistakenly identified natural phenomena, a quarter simply present too little information (point sources or some bright areas, for example), and a quarter are clear enough but lack supporting data for analysis. Only two out of 35 photographs in cases considered "high" of them are records of UFO. In one "all features appear to be consistent with the assertion that an . . . object, silvery, metallic, disk-shaped, tens of meters in diameter . . . flew within sight of two witnesses" (an Oregon farm and his wife). Fabrication cannot be ruled out, the position of the object in the same place below a cloud in two pictures suggests that it is the small suspended cloud it resembles, yet photometry of the pictures argues that the object was far away, since its cloud-lowest position is heightened as though by the scattering of light by the intervening atmosphere. The second event, which yielded 16-millimeter film, shows two bright lights moving slowly across a twilight sky in Minnesota. They were not meteors (too slow) and not birds (too steady), both aircraft and balloons seem possible but not compelling lies.

So the report goes. The investigators did not contend that they have explained every single event; they are too honest for that. They nevertheless make a real try, and overall they succeed wonderfully. The whole work seems to show conclusively that there is no prima facie case for closer study; no one can think of cases that of any reasonable cost would greatly increase our data on such unusual, diverse and transient events. The prompt trial of a few such schemes, they didn't work at all. The formal conclusion is widely known, and it seems particularly sensible and well supported: "Further intensive study of UFO's probably cannot be justified in the expectation that science will be advanced thereby."

Yet it was the ideas in new were opposite to their serious consideration for any part of their individual science. No new instruments, no big plans. New evidence, better than any we have now, would be needed to change this universally conservative view.

There are many amusing bits. "Most evening — one could scarcely go wrong — told as well as any good mystery." "And never detract about how the world's go such strange but unorganized [illegible] from the Andromeda nebula." A piece of rock [illegible] to be value [illegible] specially identified for its analysis, as its size, color and mineral [illegible] also [illegible] Arizona [illegible] "is now [illegible] formed in Brooklyn, New York, [illegible] and not in some remote corner of the galaxy."

There is a large and [illegible] section devoted to the physics of optical and radar energy, to atmospheric electricity and ball lightning, to the surprisingly widespread use of high-intensity balloons, to problems of perception and [illegible]. There is an outline of the prehistory of the UFOs, with a rather discouraging burden of misunderstanding and even false statistics on the part of many authors. There are 32 pages of photographs and many sketches and graphs.

The cases were studied, as work, absorbing and well rewarded. The report discovers how much the story is locked in the national mood of the early 1950's, the concerns of security and the misperceptions. Even the expert report made in 1953 by a panel of distinguished physicists, headed by H. P. Robertson, sponsored by the Air Force and the Central Intelligence Agency, reflects that extraordinary atmosphere. It is said that the CIA still insisted on retaining the old report, so that we learn of Dr. ——, and even "The —— opened the meeting." (Never mention the —— in print, for fear some say not there at heavy prices.) Careful students will be interested to see an overlap in minor ways between the Oppenheimer hearing and the UFO report. "Two-fighters" and the cause called ZOMC are both the expertise of two professions. It is clear that a pattern

UNDP/Project Descriptions

Commencing January 1969, the United Nations Development Programme (UNDP) will make available on a subscription basis UNDP/Project Descriptions, containing comprehensive information about UNDP-assisted projects approved by the Governing Council. Taking a step, the UNDP Governing Council wants to improve assistance for a large number of pre-investment projects. The projects range from those aimed at developing industrial and mineral sectors to those intended to develop advanced national consultancy services and public administration.

The descriptions are intended as a useful source of information for Governments, the general public, financing institutions and particularly, commercial firms and organizations interested in contracting consultancies.

Each project description will be about two pages long and will include information on the need for the project within the context of the economic situation of the country concerned; the estimated duration of the project; the expected cost of the project and how it fits in the national development plan; the work plan of the project; expert services, contracts and equipment needed for the project's implementation and the budget. Annual subscription (12 issues) US$ 50

UNITED NATIONS PUBLICATIONS
New York, N.Y. 10017

interest both of official science, with its back to antiquity, and of the secret operations of our government authors the subject. UFO's are not wholly but in large measure a creature of the American scene since 1950.

One would have welcomed a brief formal account of the scale and scope of the flying saucer "industry," which today touches even some national policy, science, and represents a vested interest in mystery. Gardner argues that neither not other credit for schoolwork on currently available UFO books and articles. The fact made that recommendation out of date; this report is well worth bound study at many levels. Finally, it is clear that the UFO reports should not be read by officials but by real interest. They are often the first colors of science itself, new seeking order in a world made anxious not only by limited fears but also by real fears. That among the witnesses are seafarers, yacht and jokers does not single out any group. Science is the stranger for this insecure and expert effort to deal with a public concern.

THE MACHINE AS SEEN AT THE END OF THE MECHANICAL AGE, by K. G. Pontus Hultén, The Museum of Modern Art ($10.95). The text of this book is brief enough, but the book is broadly conceived. Thus, it is bound between Swedish flat plate covers, embossed and color-lithographed, as apt as they are durable. It is the exhaustive catalogue by a director of the Stockholm museum who assembled the art exhibition presented in New York in the fall of 1968. He himself observes that it is in no sense a history of the machine; rather, it is "a collection of comments on technology by artists of the Western world." It is full of interest, less for the novelty of the works illustrated and explained than for the fact that it displays so many diverse works, most of which are well known in other contexts. It begins, of course, with a Da Vinci, one design for a pseudo-helicopter. Then comes one of Duchamp's Cubistic engravings of the engineered chassis for Marcel Duchamp's paper triumph. The storyteller Neuschäfer submits real clockwork figures that draw and write, one here, and a strange drawing set of the Hellen Incorpo depicting a street knife-sharpening machine drawn as a man with mechanical parts.

There is a Shortshanks etching of English gentry walking in steam-driven boots, and a familiar anonymous Victorian lithograph of a Mr. Colgiddy outside a "steam riding socket." Nonetheless, it is the 20th century that makes the collection. Most of the newest ideas of the artists are seen to be very early. There is an art museum model of a double-decker automobile that could be indefinitely tacking upward, dishes, the college and normality of machine parts and part, and kinetic sculpture (the example shown is standing waves by a vibrating metal rod) all begun before 1920. The most dazzling piece of the period is the fantastic plan of Malevich. Talks for a monument to the Third International, by Moscow, which was to have been a closed steel helix 400 meters high holding four glass-walled chambers of decreasing size, the largest revolving in a year and the smallest daily. "The technical potential to build it did not exist," and even a wooden model 15 feet high was lost, although it was much praised.

The last word also appears, in the self-destructive mechanical comedies of Jean Tinguely, the still as mounted followers of Edward Kienholz (for example "The Friendly Gary Computer," an electronic chassis in a rocking chair with a doll's legs protruding) and the reactive electronic devices of the organization Experiments in Art and Technology. Along this line is a remarkable discovery of a catholic point. The philosophical analysis of the author will not always appeal to readers who are closer to the machine than he is.

MERCURY FOR CENTRAL PENNSYLVANIA, by Herbert Elkins, Chemical Publishing Company Inc. ($10). Here is an expert's account of a living technology—up to date, coherent and personal. Pennsylvania is much older and much more complacent than its present economic scale would suggest. For the nation, pennsylvania can no longer be forecast cabinet, he defines it as the technology of the use of the heat and other products from the mainly nonferrous metallic resources of subsoil. The case of the industry is the safety match, the 400 or 500 million matches made each year in the U.S. exceed by tenfold the value of all firearms production. Matches are treated here both historically and technically, although with little attention to the purely mechanical side of their mass production. The safety match has no secret formula, its success and reuse is based on different management of the process, on maintaining uniformity in the face of small changes in materials and external conditions. The key is in details such as the use of the best hide glue ("Peter Cooper Guide the value with founding properties"), other binders are from a hardened skin over the pyrotechnic material, and the match

Condon To Head UFO Study

The Air Force, [illegible] for years by charges that it considers reports of unidentified flying objects to have a psychiatric rather than an aerodynamic basis, took steps last week to establish what it hopes will be regarded as an impressively objective scientific investigation of the UFO fetish. It announced that the distinguished physicist Edward U. Condon, who is noted for speaking his mind, has agreed to serve as scientific director of a far-ranging, no-holds UFO inquiry [illegible] by $313,000 of Air Force money. The study, under [illegible]

where Condon, 64, is professor of physics and astrophysics and a fellow of the Joint Institute for Laboratory Astrophysics.

Condon, who declined to work at Los Alamos during World [illegible] of what he considered stifling and [illegible] Security Office of Boeing [illegible] that had he was attacked by the House Un-American Activities Committee as "one of the weakest links in our atomic security," a charge that caused widespread indignation throughout the scientific community. In 1954, while he was director of research and development for Corning Glass Works, the Navy withdrew his security clearance. After he had been cleared by three government [illegible] Condon publicly denounced the procedure and, after Glass [illegible] for a clearance, resigned from Corning. In later [illegible] against the Eisenhower administration for "[illegible] indifference" to political attacks on scientists.

Condon was president of the American Physical Society in 1946 and president of the AAAS in 1953. Prior to joining the Colorado faculty, in 1964, he was professor of physics at Washington University, St. Louis.

Associated with him in the UFO study will be Franklin E. Roach, an astrophysicist and air glow specialist on the staff of the Environmental Science Services Administration, Boulder, [illegible] of the Colorado [illegible] unless [illegible] and, as a final certification of scientific purity, the National Academy of Sciences will review the results of the study.

One of the first steps will be a conference around mid-November in Boulder at which Air Force officials will brief Condon and his associates [illegible] current and [illegible] the [illegible] for the study [illegible] of [illegible].

In connection with the study, the University announced that "the Air Force has given assurance that all information in its possession which bears on the subject will be made available to the University investigators. The University will be given everything, not merely that which it [illegible]." The contract for the investigation is for [illegible] the Air Force and the study may be extended [illegible]

Edward U. Condon

"I assure you, Madam, if any such creatures as you describe really existed, we would be the first to know about it."

LONDON, W.C.2

26th. Dec. 1954

The Secretary,
Department of Air,
Victoria Barracks,
St. Kilda Road,
Melbourne.

Dear Sir,

Under the authority of the Secretary of the Department of Air, the Directorate of Air Force Intelligence arranged for two files of reports dealing with "flying saucers" to be placed at my disposal for analysis. My departure for the United Kingdom in November 1954 curtailed this investigation. The conclusions reached at that stage are given in the attached report.

If there is any desire on the part of the R.A.A.F. to continue this co-operation in any way, I would be only too happy to do so.

Yours faithfully,

H. Turner M.Sc.

(H.Turner)

file 554/1/30 pt 1

8C

REPORT ON "FLYING SAUCERS"

INTRODUCTION

1. In order to assist in assessing two files of reports held by the Director of Air Force Intelligence concerning "flying saucers", a general inquiry into the subject matter was held by the writer. Among the books investigated were the following:-

Keyhoe:	"Flying Saucers From Outer Space"
Menzel:	"Flying Saucers"
Leslie and Adamski:	"Flying Saucers Have Landed"

In addition, numerous periodicals and magazines were found to supply odd reports.

2. The Victorian Flying Saucer Investigation Committee was helpful in supplying further information. The Committee was not aware of any connection with the R.A.A.F.

3. Some local sightings of interest were personally investigated. Such investigations were found to render considerably more information than expected. Finally, discussions were had with various staff members of the Physics Department, University of Melbourne.

4. In this way, it was hoped that a basic understanding of the problem would be achieved.

5. As regards the filed reports, it was the initial intention of the writer to analyse the evidence in an attempt to understand the basic reason causing the then recent wave of saucer reports. However, largely as a result of Keyhoe's book, it would appear that this evidential analysis is no longer necessary. Instead, an attempt has been made to assign each of the various filed reports to some particular category. This is a preliminary move in understanding the methods and motives of these "saucers" rather than determining whether they exist or not.

AMERICAN REPORTS

6. It is worthwhile studying the evidence presented by Keyhoe. This ex-Major of the U.S. Marines purports to publish U.S. Air Technical Intelligence Reports dealing with sightings of "Unidentified Flying Objects". It is almost inconceivable that this is not an official release, as they bear the testimony of Albert M. Chop of the Office of Public Information, Department of Defence, Washington. Direct official confirmation from, say, the U.S. Air Attache or the Australian Liaison Officer in Washington would nevertheless be highly desirable.

7. Some of the cases discussed by Keyhoe are summarised below (in chronological order).

/....2

CONCLUSIONS

8. If one assumes these Intelligence Reports are authentic, then the evidence presented is such that it is difficult to assume any interpretation other than that unidentified flying objects are being observed. This applies particularly to those cases where an object is independently observed to be in a certain position at the one time by means of radar, visual and/or photographic methods. Such combined evidence positively eliminates alternative explanations such as 'spots before the eyes', mass illusions, meteorological phenomena (including temperature inversion), etc. In many cases, the measured velocities and accelerations are highly indicative of objects that are intelligently controlled and whose performance is superior to that known by western science. Indeed, the superiority is such that it is highly improbable that such objects have a terrestial origin.

9. An extra-terrestial origin is preferred to that of a Russian origin as, even if the Russian forces were so much in advance of the Western group that they could produce such aircraft, it is highly improbable that they would send their secret devices over enemy territory with the attendant risk of capture or breakdown. In addition, espionage would surely be more profitable if undertaken by fifth column activities rather than by the elusive aerial spotting practised by these U.F.O's.

10. The evidence presented by the reports held by the R.A.A.F. tend to support the above conclusion - namely, that certain strange aircraft have been observed to behave in a manner suggestive of an extra-terrestial origin. However, as the Australian evidence is inferior to the American evidence from the viewpoint of proving the real existence of 'flying saucers', the writer has contented himself with a modest attempt at sieving the probable U.F.O. sightings from the probable 'natural phenomenon' category. This is done in Appendix I. If one could regard this initial sorting out as being sufficiently reliable, then reports categorising U.F.O. should be re-examined in an effort to understand the methods of propulsion and the motives for the visitations. Reports that are simply visual have strictly limited analysis value. Many new reports involving instrumental plotting are needed. It is possible to list a number of such recommendations.

RECOMMENDATIONS

1. To increase official interest in U.F.O. reports.

2. To have at least one full-time investigator who is encouraged to interview personally any witnesses involved in an interesting report. Such interviews tend to uncover considerable information and can convert a nebulous report into one suitable for analysis.

3. Some measure of publicity to encourage people to submit their reports. A warning should be given to potential hoaxers that action will be taken if the hoax involves public expense.

4. Liaison established with the U.S. Air Force Intelligence with a view towards exchanging information and verifying Keyhoe's claim.

/...4

5. Request information from the R.A.F. and the Canadian "Project Magnet".

6. An attempt could be made to form a Scientific Advisory Panel to assist in the analysis of reports, provided that in the future these reports are more numerous and of greater detail than most earlier accounts. The first three recommendations should enhance these requirements. The U.S.A.F. and R.A.F. may even be willing to permit such a panel to examine their reports.

7. It is highly recommended that more radar sightings be gained. One radar report is worth many unsupported visual reports. Only radar can supply range, height, speed and true course. Visual aids can add shape and colour and, if synchronised with radar, true size. More radar stations are needed and they should operate for longer periods. Radar operators should be briefed as to the procedure to be adopted when a U.F.O. is suspected. They should be familiar with such things as anomalous propagation and ionised clouds.

Dear Mr Turner

Thank you very much for your interesting and informative report on unidentified Flying Objects. Terry and I are most appreciative of your efforts to assist us in this field.

2. My Director has decided to send copies of your report to both Washington and London, together with some of the more probable of the sighting reports, in an endeavour to learn their official views. If red tape will permit, we will advise you of the results.

3. In compliance with your request to Terry, I am attaching a copy of your report.

4. I do hope you are enjoying your work in England.

Kind regards
Peter Birch

Mr. H. Turner, M.Sc.
Australian Scientific Liaison Office
Africa House
Kingsway
LONDON, W.C.2.

14

D.A.F.I.

1. Reference Mins.2 and 3.

2. Professor Turner accepted Keyhoe's book as being authentic and based on official releases. Because Turner placed so much weight on Keyhoe's work he emphasised the need to check Keyhoe's reliability. Encl.12A removes Keyhoe's work as a prop for Turner's work so that the value of the latter's findings and recommendations is very much reduced.

3. A suitable investigating panel would presumably require representatives from at least:-

(a) Commonwealth Observatory.

(b) Melbourne University Physics Department.

(c) Meteorological Bureau.

(d) Weapons Research Establishment.

(e) R.A.A.F.

(f) Army.

(g) Navy.

(h) D.C.A.

(i) Medical world - specialists in both psychology and the function of the eye.

4. Such a panel could not sit as a panel but would have to act as a number of individuals each considering each incident. Only one or two representatives could interview the people making the report and this would seriously lessen the value of the investigation. I don't think it is practicable or justified.

5. I suggest:-

(a) We have met our commitment to the Minister up to the date of Turner's report.

(b) We should continue on from Turner's work by transcribing recent and future reports onto the U.S.A.F. form at Encl.12C and forwarding them to the U.S.A.F.

Gp.Capt.

FLYING SAUCERS

I refer to Wing Commander Dawsons' DO 1A/1055 of 21 Sep on the above subject.

I have discussed with the USAF the status of Major Keyhoe. I understand that his book is written in such a way as to convey the impression that his statements are based on official documents, and there is some suggestion that he has made improper use of information to which he had access while he was serving with the Marine Corps. He has, however, no official status whatsoever and a dim view is taken officially of both him and his works.

Keyhoe and other writers on this subject have caused the USAF a considerable amount of embarrassment, and I understand that it was largely for the purpose of refuting their arguments and conclusions that the Air Force undertook Project Blue Book, a copy of which you will have received by now. I believe that this publication explains something like 98 percent of the cases reported. The Air Force issued it, not only to counter earlier statements on the subject, but also in the hopes that it would cut the ground from under a new book by Keyhoe which is soon to be published. However, subsequent to its issue the new Secretary of the Air Force refused to agree to its release to the public. This was the subject of my signal DJ/60 of 17 Oct 55.

As stated in this signal, I have discussed with the USAF the extent to which the publication can be used by you in replying to the experts who are worrying you. They are quite happy to have you use it as a basis for a statement on the subject, provided you do not directly quote its contents or refer directly to it or its source.

As the Blue Book has been sent to you, I have not made any request for individual reports held by the USAF. However, if you still require them I shall be pleased to do so. New reports of unidentified flying objects are made available to me on the reading panel, and if you wish to have copies of them, please let me know. I have not bothered to take them in the past as I felt that they would be of no use to you.

Wing Commander
RAAF Intelligence Representative

Since writing the above I have received the attached Summary which may be of interest to you.

THE FOREIGN SERVICE
OF THE
UNITED STATES OF AMERICA
Office of the Air Attache
American Embassy

39 Jardine St., Kingston
Canberra, A.C.T.
5 January 1960

SUBJECT: Aerial Phenomena

TO: Directorate of Air Force Intelligence
Administrative Building
Canberra, A.C.T.

Attn: Squadron Leader F. A. Lang

Dear Sir:

1. With reference to our recent conversation regarding the status of the National Investigating Committee on Aerial Phenomena, we have queried our Headquarters and have received the following reply:

a. The organization referred to is a group of private civilians whose interest is unidentified flying objects and other phenomena. Major Keyhoe has no official status although he is a retired Marine officer. United States Air Force press releases and evaluations of Air Technical Intelligence Center are regularly made available to the committee through accredited media. Keyhoe is a writer of Science Fiction. He regularly makes unfounded claims that United States Air Force does not reveal information.

2. I trust the above information satisfies your immediate requirements.

3. If we can be of further assistance, please do not hesitate to let us know.

Sincerely,

MANCE C. SMITH
Major, USAF
Assistant Air Attache

DEPARTMENT OF AIR

MINUTE PAPER

(This side only to be written on) 569/6/793(4)

Subject: UFO'S REPRESENTATION TO THE MINISTER

EXEC O AIR

1. In answer to Mr L.V. Peck the following points apply:

   a. There is no substantiated proof of extra terrestial beings having landed in Australia or in fact anywhere on Earth.

   b. Photographs fall into the following categories:

      1. Hoaxes.

      2. Faults in developing process.

      3. Lens flare.

      4. Other photographic anomalies.

      there are no officially reported photographs which do not fall into the above categories.

   c. The Australian Government is not "secretive" about UFO's, as full lists of all sightings are readily available to any person who requires them. Directorate of Public Relations, Department of Air issues these lists. A current list is enclosed.

2. It could be suggested that Mr Peck buys a Bantam Book paper back 'The Condon Report' which is the report of the official investigation carried out in the United States by a scientific team headed by Dr Edward U. Condon. This report contends that there is nothing of an interplanetry nature occupying American air space.

3. It is felt that a considerable amount of time could be saved if a standard reply could be made for queries such as this. The reply should include the answers on photographic investigations, Dr Condon's report and a statement of the Department's concern with air space security and not scientific investigation.

MINISTER FOR AIR
15/5/69

P.M.B. 44,
Balboa Street,
Kingscote, S.A.,
S.A. 5223.

The Minister for Air,
Canberra.

Dear Sir,

During the past few years, there have been a great number of so called 'Flying Saucers' (U.F.O.) sighted, of which many have been photographed. Is it known whether these craft come from a foreign country, planet, or solar system, and if so, what is the Australian Air Force doing to defend a possible attack. If not, why is the government so secretive.

It was reported about eighteen months ago that the occupants of a 'flying saucer' had been captured somewhere in Latin America, - what became of these persons if the report was valid.

Finally, should not the United States's manned space programme be cancelled in case of a possible attack. Thanking you,

Reuben V. Peck.

Subject: UFO's RELEASE OF INFORMATION TO PUBLIC

FR 2

1. Could you send out a standard reply to this please, including a summary of sightings.

2. Reply to include following answers.

a. Usual procedure, if a report is received by the air force either directly or through local police or Department of civil aviation, ~~then~~ a form is sent to the observer for completion and return.

b. The Air Force investigates all reports received officially and treats each case on its merits.

c. Air Force policy is to investigate sightings from the aspect of security of Australian air space and not in a scientific capacity.

d. All pilots report unusual sightings to Air Traffic Control who forward a form to the Air Force.

e. Most reported sightings have a natural explanation. Between 5% and 10% are not resolved due to insufficient evidence eg. sightings of lights lasting one or two seconds.

f. There are several Societies who investigate reports made to themselves, unfortunately we do not have the addresses.

g. The United States has had a team of scientists, under Dr Condon, investigating UFO's in America for some years. Last year the study was closed, and the report was published as a book in paper back form (Bantam Books). This report contends that there is nothing of an inter-planetary nature occupying American air space.

Directorate of Air Force,
Intelligence,
Canberra, 2600. A.C.T.

Dear Sir,

Iam doing a Social studies Report on Unidentified Flying Objects and wish to know of some of the activities of the Australian Government on the topic.

Could you please tell me the usual procedure after a U.F.O. is reported by a citizen of Australia, a pilot or a radar operator. What is the policy towards contactees and the Royal Australian Air Force policy to U.F.O.s. Also what is a pilot of a civilian or air force plane to do if he sees a U.F.O. in the air like many American pilots have. Do you have any records of aircraft sighting U.F.O.s and where do U.F.O.s come from.

Would you please send any pictures, other information and addresses pertaining to Unidentified Flying Objects and life in outer space.

Thanking you.

Yours Faithfully

.....

James Warn.

BOOKS

The Condon report on unidentified flying objects, and other matters

by Philip Morrison

SCIENTIFIC STUDY OF UNIDENTIFIED FLYING OBJECTS, conducted by the University of Colorado under contract to the United States Air Force, Edward U. Condon, Scientific Director, Daniel S. Gillmor, Editor. Bantam Books ($1.95).

More than a decade ago the political struggles that are born of the fears and the strengths of a great nuclear power were made starkly clear by a Black Cover document entitled *In the Matter of J. Robert Oppenheimer*. That work was unrelieved tragedy, its content and its impact more fearful even in form than in random neither concentrated. Once again the reader is presented with a thick official volume of generously illustrated interest describing another unique episode of our times. This document, however, is diffuse, cheerful, eclectic, deliberately instructive and incidentally illustrated. It is no force but rather a high and human example, in a curious way the real human overlay.

This report presents the work of able men, led by a wise physicist of high repute, who have tried to bring order to the disorderly, to make what sense they could out of meager and hard data, out of cryptic fraud and honest and emotionally charged observation. They have succeeded brilliantly, building a monument to reason, to experiment and to intellectual patience, modesty and courage. The heart of their work is the careful study of about 60 unusual reports. Their chief data are the accounts of eyewitnesses, their main instrument is the tape recorder. The result of the work, however, is not psychological but physical. Each report is described, and a set of sensible hypotheses is tested against the data. Could the objects have been a balloon? Then seek the data on upper winds. Was a strong magnetic field used to stop an automobile? Then compare the magnetic pattern of the automobile body with other automobiles and other cars which passed by the same place.

The most interesting cases are those that present photographic evidence. These have been analyzed with great precision and skepticism, mainly by William K. Hartmann, a planetary astronomer at the University of Arizona. About a quarter of the photographs show evidence of fabrication, a quarter are mistakenly identified natural phenomena, a quarter simply present too little information (point sources in cloudy skies, blurs), and a quarter are "good enough but lack supporting data for analysis. Only two out of 25 photographic cases remained. Both of these are events of 1950 in one "all factors . . . appear to be consistent with the assertion that an . . . object, silvery, metallic, disk-shaped, was of matter to alumnitor . . . flew within sight of two witnesses" (an Oregon man and his wife). Fabrication cannot be ruled out; the position of the object in the same place below a cloud in two pictures suggests that it is the small suspended model it resembles, yet photometry of the pictures argues that the object was far away, since its shadowed portion is brightened as though by the scattering of light by the intervening atmosphere. The second event, which yielded 18 millimeter film, shows two bright lights moving slowly across a cloudless sky in Montana. They move too narrow then close and not block (no stars), both aircraft and balloons remain possible but not compelling.

So the report goes. The investigators do not contend that they have explained everything every event, they are too honest for that. They nevertheless make a real try, and over all they succeed wonderfully. The whole work seems to show conclusively that there is no prima facie case for closer study, no one case. Each of them is not of any importance and would greatly increase our data on such unusual, diverse and malapropos events. The group tried out a few such schemes; they didn't work at all. The formal conclusion is widely known, and it seems particularly sensible and well supported. "Further extensive study of UFO's probably cannot be justified in the expectation that science will be advanced thereby." Yet it speaks there for one week appearance when science considerations be supported, then it should not matter. So also appropriate, in big phase. New evidence, to be sure, any one new case, would be needed to change this sensibly conservative view.

There are many amusing bits. The investigators, in some considerable prominence, told us with some good humor — (at some point about two or so wife's good rather bad management of Americans into the Administration office." A group of essential but necessary to be made clear, precisely described by an inventory of 30 cells and numerical (1.25 alone. Between Jackpot, Nevada Co. it was "incorrect" to Brooklyn, New York, U.S.A., and not in some remote corner of the galaxy."

There is a large and interesting section devoted to the physics of optical and radar images, to atmospheric electricity and ball lightning, to the surprisingly underpriced use of high-altitude balloons, to problems of perception and so on. There is an appendix of the problem of the UFO's, with a quite the amazing number of misleading and even false citations on the part of many authors. There are 32 pages of photographs and many diagrams and graphs.

This report seems edited, organized, valuing and well informed. The report documents how much the story is linked to the cultural mood of the early 1950's, the emergence of science into the mass perception. Even the report report made in 1953 by a panel of distinguished physicists, headed by H. P. Robertson, sponsored by the Air Force and the Central Intelligence Agency, reflects some of boundary atmosphere. It is sad that the CIA did actually an outreaching for and report, as did we learn of the —— and even "The —— opened the morning." Never mention the —— in print, the rule what we are there at least quarter? Careful students will be interested to see an overlap in color and between the Oppenheimer hearings and the UFO report. "Intelligence" and the other called ZOBIC are both the expertise of one professor, it is clear that a professor

Survey of

PROGRESS

Report of the World Land Reform Conference, 1966

The purpose of the Conference was to provide the Governments of Member States with a forum for the exchange of views and experience on adopting some of objectives, with an opportunity for a discussion of problems of this current phase of the right of ownership and social development, and for the exchange of experience in the phase of the implementation of land reform programmes by the [illegible]

Statistical tables include: Population and vital statistics, health expenditure, food consumption and nutrition, housing, education and cultural activities, labour force and conditions of employment, income and expenditure. Complete in one bound volume. Sales No. E.68.XVII.1 $8.25

UNDP/Project Descriptions

Commencing January 1969 the United Nations Development Programme (UNDP) will make available on a continuing basis UNDP Project Descriptions containing comprehensive information about UNDP-financed projects approved by the Governing Council. Taking over the UNDP Governing Council's mandate relating to the [illegible] of UNDP projects, the [illegible] Project Descriptions will provide information on the [illegible] industrial, agricultural and social sectors as well as information on the [illegible] industrial, agricultural and social sectors and other activities.

The descriptions are intended as a useful source of information for Governments, the general public, financing institutions and specialized agencies interested in promoting opportunities.

Each project description will be accompanied by a [illegible] and will include information on the aims for the project, [illegible] of the economic situation of the country concerned, the expected duration of the project, the [illegible] of the project and how it [illegible] to the national development plans, the work plan of the project, special [illegible], [illegible] and equipment required, the [illegible] of counterpart [illegible] and the project. Annual subscription [illegible] $36.00

UNITED NATIONS PUBLICATIONS
New York, N.Y. 10017

minute bits of official science, such as talk in weapons, and of the secret operations of our government without the slightest. UFO's are not wholly but to high measure a creation of the mass media (see 1976).

One would have welcomed a brief factual account of the nature and scope of the flying saucer "industry," which today reaches even some cultural publications, and expressions a wished interest in mystery. Condon urges that teachers and also people for schoolwork be currently available UFO books and articles. He has made that recommendation not of date, the report is still worth broad study at many levels. Finally, it is clear that the UFO reports should not be met by ridicule but be read in secret. They are often the best evidence we have, new making sense in a world made anxious not only by frightful fears but also by real ones. That among the witnesses are madmen, liars and jokers does not rule out any genuine. Science is the stronger for the sincere and expert effort to deal with a public concern.

THE MUSEUM AS SEEN AT THE EXPOSITION MECHANICAL ARTS, by K. G. Pontus Hultén. The Museum of Modern Art 1968 $5. The text of this book is fresh enough, but the book is literally carried. That is, it is bound between Swedish translation covers, coloured and [illegible] lithographed, as not as they are durable. It is the extensive catalogue by a director of the Stockholm museum who assembled the art exhibition presented in New York in the fall of 1968. He himself observes that it is in no sense a history of the machine; rather, it is "a collection of statements on technology by artists of the Western world." It is full of interest, less for the novelty of the works illustrated and explained than for the fact that it displays so many diverse works, most of which are well known in other contexts. It begins, of course, with a Da Vinci, one design for a portable helicopter. Then comes one of Dürer's fantastic engravings of the conjoined chariots for Maximilian's paper triumph. The marvelous Newfound automata, and the black figures that dance and write are here, and a strange drawing out of the Italian Futurist depicting a silver turbo-charging machine drawn as a man with mechanical parts.

There is a Shakespeare sketching of English poetry working in steam driven boats, and a further manuscript Vienna lithograph of a Mr. Gidoffski setting a "steam rolling cocker." Nowhere, it is the 20th century that makes the collection. Most of the newest ideas of the artists are seen to be very early: there is an art nouveau wax model of a double-decker automobile that could be technically today, capital illusions, the collage and assembly of machine parts and junk, and kinetic sculpture (the triangle shown is dancing wildly to a vibrating metal rod) all begins before 1920. The most startling concept of the period is the fantastic plan of Vladimir Tatlin for a monument to the Third International in Moscow, which was to have been a tilted steel helix 400 metres high holding four glass-walled chambers of decreasing size, the largest rotating in a year and the smallest daily. "The technical potential to build it did not exist," and even a wooden model 33 feet high was lost, although it was much praised.

The last word also appears, in the self-destructive mechanical capsules of Jean Tinguely, the still in memorial tableaux of Edward Kienholz (for example "The Friendly Give Computer," in which music chooses to a rocking chair with a doll's legs protruding) and the exciting electronic devices at the organization Experiments in Art and Technology. Although this is a remarkably fine record of a cathetic state. The philosophical analysis of the writer will not always appeal to readers who are closer to the machine than he is.

MECHANIC AND CHEMICAL PHENOMENA, by Herbert Elton. Chemical Publishing Company Inc. $15. Here is an expert's account of a flying technology—up to date, coherent and personal. Production is much older and much more complicated than an present-day reader would suspect. For the motive phenomena can no longer be thought about, for instance, at the technology of the use of the heat and other products from the middle atmosphere evaporation contrary of solids. The case of the industry is the safety match, the 100 or 500 billion matches made each year in the U.S., exceed by include the value of all fireworks production. Matches are treated here both technically and mechanically, although with little attention to the purely mechanical side of their mass production. The safety match has an secret formula, its manufacture actually is based upon the arrangement of the papers, on maintaining authority in the face of small changes in materials and natural conditions. The key is in details such as the use of the best hide glue ("Peter Cooper Glue. Be extra with finning properties") other leaders are [illegible] a hundred dies over the pyrotechnic material, and the match

UNIDENTIFIED FLYING OBJECT REPORTS

Reference: A. 554/1/30 Pt2(27) dated 2nd June 1969

1. It has become necessary to emphasise the need for some thought and effort to be put into Part 2 of the UFO report forms. Some old type forms recently received have only dashes or blanks as answers to specific questions. This does not enable information that has been obtained or sought by the investigating officer to be deciphered.

2. Faults found include:

a. A blank in the section relating to civil aircraft; there was nothing to indicate that an effort had been made to find the answer.

b. One report was left blank in the planet calculation section, where Venus was in fact in the correct position at the time, and was, furthermore, at its greatest brilliancy.

c. The majority of reports have no answers to the last three questions on the old form. This makes the report virtually useless as the investigating officer is the only person with a close enough knowledge of the situation to make an estimate of the cause, unless it has been definitely decided in answers to previous questions.

3. As you no doubt are aware, the public is becoming more and more susceptable to the UFO syndrome, and the press and radio thrive on it. This in turn generates questions in Parliament which require answers sometimes at ministerial level, and unless effort is put into the investigations then the correct answers cannot be given.

4. All units under your command should be advised of the necessity to fully investigate UFO's.

(T.G. MINETT)
Wing Commander
For Chief of Air Staff

(30)

UFO'S - REPRESENTATIONS TO THE MINISTER

Exec O Air

1. Answers to the questions raised by Mr E. Law are as follows:

a. Yes;

b. Yes - often more serious than the authors of the reports treat them;

c. To the best of our knowledge - No;

d. Yes - all reports and investigations are classified 'Restricted', but summaries of all reports, with the possible cause, are readily available from RAAF Directorate of Public Relations. Enquiries should be sent to them for attention PRR. These summaries are compiled every six months (one is in the process at present) and contain a brief of all reports received. A copy of the summary to December 1968 is attached.

e. No classified information concerning UFO's is held by the RAAF.

2. As you are probably aware the Department of Air is concerned solely with any possible threat to Australian security and does not go into detailed scientific investigations of UFO reports.

3. The United States has had a team of scientists, under Dr Condon, investigating UFO's in America for some years. Last year the study was closed, and the report was published as a book in paper-back form. This report contends that there is nothing of an inter-planetary nature occupying American air space. A copy of the report is held in this directorate.

4. A copy of the Condon report on the magnesium alloy case is also attached, and it appears that Mr Wilbert Smith did not represent the Canadian Government in its official study of UFO's in Canada.

SUMMARY OF UNIDENTIFIED AERIAL SIGHTINGS REPORTED TO DEPARTMENT OF AIR, CANBERRA, ACT. FROM 1960

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
23 Jan 60	Twin Yellow Lights over Launceston, Tasmania. Elevation 20° - 30°	Refraction of light
1 Feb 60	Bright object emitting flashes, moving W to E over Melbourne, Victoria.	Astronomical
26 Mar 60	Spherical, silvery object, elevation 80° - 85°, over Canberra, ACT.	Astronomical
13 Jun 60	Flashing red light and fixed white light over Mangaloro, Victoria.	Aircraft
26 Jun 60	Explosion of light with spark showers, elevation 40° en route Melbourne, Victoria, to Launceston, Tasmania	Astronomical
18 Aug 60	Bright flashing object travelling E to W, 150 miles N of Mullewa, WA.	Astronomical
2 Oct 60	Crescent shaped object, horns lighted, 5° above southern horizon, Launceston, Tasmania.	Astronomical
4 Oct 60	"5 flying saucers and a mother ship" cigar shaped, 4 vertical bands, over Cressy, Tasmania.	Astronomical
13 Oct 60	White light, angle of elevation 45°, Mackunda Downs, Queensland.	Astronomical
25 Oct 60	Downs, Queensland.	Astronomical
15 Oct 60	UAS traversing sky, W to E over Launceston, Tasmania	Met balloon with light attached.
18 Oct 60	Slow moving cigar-shaped object similar to aircraft - bright orange rear portion, rest dull grey.	Probably TAA aircraft Viscount VH-TVC
27 Oct 60	Mysterious explosions, Cressy Area, Longford, Tasmania - orange coloured ball hovering in sky, also described as cigar-shaped.	Astronomical
27 Oct 60	Orange/blue/red round object, trailing cloud of sparks, exploded at Fontina, Tasmania.	Astronomical
15 Nov 60	Orange translucent ball, approx 70 ft in diameter at altitude 35,000 ft heading 140° at high speed.	Astronomical
27 Nov 60	Light in sky over Fontina/Cressy, Tasmania	Astronomical
29 Nov 60	Point of blue/green/red light, just above horizon, rising slowly over Trevallyn, Tasmania.	Astronomical

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
7 Dec 60	Silvery, disc-shaped formation of 30/60 objects over Launceston, Tasmania, flying southwards.	Flight of pigeons
21 Dec 60	24 grey/blue objects, moving southwards over Great Lakes, Tasmania.	Reflection of light
25 Dec 60	Star like object, 20 minutes to pass over ½ sky over Campbell Town, Tasmania, west to east.	Satellite
5 Jan 61	Bright light in sky, Oatlands, Tasmania	Astronomical
Early Jan 61	Bright, white sphere, 45° from vertical, over Campbell Town, Tasmania.	Astronomical
18 Jan 61	Apparently controlled light, no sound, several sightings around Kerang, Victoria.	Astronomical
12 Mar 61	Bright light, with tail of orange sparks over Inglewoodpilly Queensland, from N to S.	Astronomical
9 Apr 61	Flashes of light west of Seymourfield, Victoria, similar to lightning.	Astronomical
23 May 61	Large object like a meteor - position 32°30S 152°08 object broken up.	Astronomical
25 May 61	Full silvery thermometer-shaped object - Devonport, Tasmania - seen through binoculars.	Aircraft
5 Jun 61	Conical shaped object falling to earth - Darwin, NT.	Astronomical
7 Jun 61	Oval shaped, red-glowing object, Cairns, Queensland, photographed through 4 in telescope	Temperature inversion, sighting of an aircraft.
31 Jul 61	Long white glowing object, flaming tail passed train on railway, 285 miles south of Darwin, NT	Astronomical
6 Aug 61	12 objects flying high, in pairs, dropping white substance - Meekatharra, WA.	Probably migrating "balloon spiders"
24 Aug 61	Red light, elevation 3.5° at Hobart airport.	Astronomical
Nov/Dec 61	Golden sphere with silver protuberances on either side - like motor armature, moving and rising in westerly direction, Koorda, WA.	Astronomical
28 Dec 61	Spherical object, emitting flashes of green and orange light - slow moving - Collaroy, NSW.	Astronomical
16 Jan 62	Fiery, rocket-like object across Caulfield, Vic.	Astronomical
23 Jan 62	Green fading to yellow object over East Selo, Vic	Probably private aircraft.

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
30 Jan 62	White spherical object, Manly, NSW	Astronomical
25 Jan 62 2 Feb 62 13 Feb 62	Bright white, planet-like object, sometimes orange and occasionally zig-zagging or changing direction, Fremantle, WA.	Astronomical
3 Mar 62	White spherical object with metal lustre, Manly, NSW	Astronomical
11 Mar 62	Star-like object, 75° elevation to SSW of Flinders Island, Tasmania	Astronomical
13 Apr 62	3 objects, 2 with fiery trails, moving from NW direction over Tennant Creek, NT.	Astronomical
5 May 62	White object, zig-zagging, Redcliffe, WA.	Astronomical
5 May 62	Contrail and metallic glint preceding contrail, over Richmond, NSW	Aircraft
7 May 62	Dark glinting object leaving 4 condensation trails - climbing vertically over Holbrook, Victoria	Aircraft
25 May 62	Light, travelling across sky, stops, changes course and gradually disappears, Lucinda Point, Queensland.	Astronomical
25 Jun 62	Glowing red object, great size and speed at Kurrajong, NSW.	Astronomical
22/23 Aug 62	Silver-coloured object over Yass, NSW	Astronomical
16 Aug 62	Star-like object, red/green/blue - slowly moving up/down/right/left over Kimberley, Tasmania.	Astronomical
31 Aug 62	Bright star-like object moving across sky over Denmark, WA.	Aircraft
Aug 62	Starlike object, stationary in sky over Cressy, Tasmania	Astronomical
Aug 62	Moving, star-like object Launceston, Tasmania.	Astronomical
23 Sep 62	Bright cluster of lights moving from S to N - aircraft on route Christchurch, NZ, to Sydney, NSW.	Astronomical
13 Oct 62	Aircraft like object high over sky, leaving yellowish trail - Canberra, ACT.	Aircraft
30 Oct 62	Large object with red front emitting thick orange coloured exhaust - over Goulburn, NSW	Astronomical
3 Nov 62	Bright metallic glinting needle shaped object flying in straight-vertical path over Cressy, Tasmania.	Aircraft
8 Dec	Yellow, star-like object from S to N in straight path, over Cressy, Tasmania.	Probably Satellite
17 Dec 62	Cylindrical object, with 2 vertical projections travelling NNE/SSW over Norfolk Island.	Aircraft

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
Jan 63	Apparently spherical object, white vapour emitted. Moved downwards in sky over Penna, Tasmania.	Astronomical
15 Feb 63	Grey, rotating object descending and then moving over to West - gave off swishing sound, Moe Victoria.	Tornado like meteorological manifestation
Feb 63	White, spherical object, illuminated, in level flight over Maitland, NSW.	Satellite
27 Feb 63	Two bluish/green lights, oval in shape, oscillating in sky in Lorne, Ferntree, Victoria.	Refraction of light.
8 Apr 63	Two bright objects, star-like, side by side, stationary, Tasmania.	Refraction of light.
7 Apr 63	Long slender, silvery-white pencil-like object - soundless, Forster, NSW	Aircraft
19 May 63	Bright red/white object, rising vertically, looked like bulldozer. Mt Gambier, SA.	Astronomical
1 Jul 63	Explosion of light in sky over Melbourne, Victoria.	Astronomical
3 Jul 63	Bright greenish/blue light over Iron Range, Queensland.	Astronomical
19 Jul 63	Bright star-like object, red, stationary over Deloraine, Tasmania.	Astronomical
25 Jul 63	Light grey, circular object, noise like jet engine heard, hovering above Warragul, Victoria.	Tornado
8 Aug 63	Shower of lights over Darwin area, NT, making swishing noise	Astronomical
20 Aug 63	Explosion in sky Turner Station/Ord River Station, WA. Silver spot or streak sighted before explosion.	Re-entry of Cosmos 2.
23 Oct 63	White starlike object, bulbous front and elongated tail - Mt Dandenong area, Victoria	Astronomical
19 Nov 63	Bright orange light, jet engine noise - from N to NW, Moorabbin, Victoria.	Astronomical
26 Nov 63	Pinkish/brown starlike object oscillating over Beaumaris, Victoria. Rotating in circular manner towards south.	Astronomical
24 Dec 63	Marks on negative of photo taken at RAAF, Darwin.	Static charge on photo paper during loading of camera

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
23 Jan 64	Seen at sea by crew of a vessel NE Point of Groote Eylandt, WA. Large lights in water, each compass go "Haywire". Shadow in centre of lights rotated clockwise, causing lights to pulsate.	Unknown
24 Feb 64 2 Mar 64 6 Mar 64	Bright light like bushfire, Balladonia, WA, Eyre Highway (178 mile post).	Astronomical
3 Mar 64	White, planet like object, bright light, Bridport, Tasmania.	Astronomical
22 Mar 64	Cigar shaped, travelling sideways, brown colour, at Armidale, NSW	Astronomical
9 May 64	Two moving lights, yellowish, Pascoe Vale, Victoria oscillating in sky.	Refraction of light.
24 Jul 64	Formation of emitted objects over Longreach, Queensland.	Astronomical
1 and 2 Aug 64	Bright headed object, glowing tail over Onslow, WA.	Astronomical
2 Aug 64	Rocket like object, with windows in side, yellow/orange, above Wittenoom Gorge./Tumbarley Range, WA.	Astronomical
12 Aug 64	White light moving across sky over Kavieng, Papua and New Guinea - like bright star.	Satellite
17 Aug 64	Bluish star like object, moving in circles over Launceston, Tasmania.	Astronomical
2 Sep 64	Two silvery solid oval objects seen on flight Melbourne/Canberra	Refraction of light
22 Sep 64	Object like exploding meteorite - lit up surface of sea, Cambridge Gulf, WA.	Astronomical
8 Nov 64	Light at horizon, Lashed Lighthouse, Tasmania.	Astronomical
8 Nov 64	Long and narrow, red/orange object - travelling fast over Point Sorrell, Victoria.	Astronomical
4 Dec 64	Strip of scrub 600 yds wide, 4½ miles long subjected to extreme heat, Queensland.	Bushfire
13 Jan 65	Apparent aerial objects, with vapour trails, flying in formation over Tasman Sea.	Astronomical
17 Jan 65	Elongated light with tail- oscillating in sky over Trevallyn, Tasmania.	Astronomical
17 Jan 65	Two red lights and line of apparent cabin lights - stationary over Nuntone, Victoria.	Refraction of light
23 Feb 65 10 Mar 65 1 Apr 65	Orange lights in sky over South Cottesloe, WA.	Probably Vampire aircraft from RAAF Pearce.

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, Canberra, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible cause.
19 Mar 65	Yellow spherical object moved from overhead to horizon in SE direction - Lakes Entrance, Victoria.	Astronomical
19 Mar 65	Orange spherical object, West Tamar, Tasmania.	Astronomical
21 Mar 65	Sphere with red dome on top; 3 illuminated tails - moving Southwards over Malvern, Victoria.	Weather balloon
22 Mar 65	Yellow steady light from spherical body moved about the sky	Astronomical
24 May 65	2 objects, one above the other, silvery, moved from SSW over Geelong area, Victoria.	Refraction of Light
21 Apr 65	Dark grey/black amorphous object over Pakenham East Victoria - moving erratically up and down	Tornado
5 May 65	Banana shaped, white/orange object over Mowbray, Tasmania	Astronomical
5 May 65	Green changing to orange to green light over Youngtown, Tasmania	Astronomical
13 May 65	Slightly elongated, brightly lit, broke into several pieces, over Griffith, NSW.	Astronomical
13 May 65	Greenish/yellow light travelling fast over Queanbeyan, NSW	Astronomical
25 May 65	Blue light emanating from object coloured red - through to green - hovered in sky. Emanated light sufficient to illuminate beach - Bougainville Papua and New Guinea	Unknown
3 Jun 65	Bright starlike object, increasing to size, Bowen/ Proserpine area, Queensland.	Astronomical
11 Jun 65	Yellowish ball with tail. Emitted brilliant bluish-white flash on disappearing over horizon, Mulchinberri Station NT.	Astronomical
17 Jun 65	Bright object, emitting red light directed to earth Passed over Sowataitai, Papua and New Guinea	Astronomical
24 Jun 65	Star shaped object, yellowish/white, moving over Youngtown, Tasmania.	Echo 2 Satellite
24 Jun 65	Saucer shape- dome top and rows of lights across front and along side - bluish white, red trail, Dennis Station, via Nebo, NT	Astronomical
24 Jun 65	Bright light, oscillating from L to R - Bougainville, Papua and New Guinea	Astronomical
29 Jun 65	Blue to green, cigar shaped object, red glow at rear Limitsfarms, Tasmania.	Astronomical
29 Jun 65	Bright object with short tail, moving N to W over Launceston, Tasmania	Astronomical

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of aerial Sighting	Possible Cause
29 Jun 65	Vivid light blue, circular shape, travelling NS, Longford, Tasmania.	Astronomical
3 Jul 65	Loud humming, glowing object, yellow/white light emanating from object illuminated herd of cattle, Kimberly, Tasmania.	Astronomical
5 Jul 65	Bright white light, near Elliot, Queensland	Satellite
5 Jul 65	Bright light over sea, Tewetown, Papua and New Guinea	Satellite
13 Jul 65	Bright light oscillating from L to R, Bearanda, Papua and New Guinea	Astronomical
15 Jul 65	Brilliant white light in sky at dawn rise over Marella Park, NT	Astronomical
15 Jul 65	White spherical object, Canberra, ACT	Astronomical
17 Jul 65) 18 Jul 65) 19 Jul 65)	Red glowing cylindrical object, moving from L to R (oscillating) emitting "diesel-engine" sound, Nivani Plantation, Samarai, Papua and New Guinea	Astronomical
22 Jul 65	Bright light turning from red, through white to green and red, Selby, Queensland.	Astronomical
30 Jul 65	Silver coloured object - disappeared with flash, 70 miles west of Cook, SA	Astronomical
Aug 65	Saucer shaped object with bluish green glow at rim, grey in colour, Vaucluse Beach, Sydney, NSW.	Tornado
1 Aug 65	Bright green/red/white light, Woodstock, NSW	Astronomical
3 Aug 65	Two starlike objects over Frankston, Victoria	Met Balloons
4 Aug 65	Silvery sphere with aerial on top, Orange, NSW	Met Balloon
24 Aug 65	Red/orange holy, leaving trail of white, came from SW Lat 1048 south long 13345 East, Western Australia	Astronomical
26 Aug 65	Flashing light travelling NS, Goomalling, WA	Astronomical
26 Aug 65	Spherical, starlike objects, Launceston, Tasmania	Astronomical
14 Sep 65	Flashing red, green, white, flying object, Gasawa, Papua and New Guinea	Astronomical
19 Sep 65	Streak of light, Dubbo, NSW	Astronomical
15 Sep 65	White object sighted west of Port Moresby, Papua and New Guinea. Moved westwards, slowed then sped northwards.	Unknown
27 Sep 65	Bright light in sky NNW of Goroka, Papua and New Guinea. Intensity of light fluctuated. Later disappeared below horizon.	Satellite

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, C.M.S.E.U., and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
2 Nov 65	Dull vertical narrow beam ascending from sea offshore Binara Point, Papua and New Guinea	Water spout
27 Nov 65	White, apparently triangular in shape, stationary in sky, under moon, Launceston, Tasmania.	Astronomical
2 Dec 65	Bluish-through-to-reddish light, larger than star, 20° above horizon. Disappeared below horizon after about 10 minutes. Papunbitta, Northern Territory.	Satellite
13 Dec 65	Bright object high in sky moving N to S for about 10 minutes at Taroona Tasmania.	Satellite
1 Jan 66	Bright flash high in sky for about 5 minutes which left a smoke trail. Aitape TPNG	Meteor
17 Jan 66	Unusual light effects on two 35 mm colour slides taken at night in Perth WA.	Camera lens aberration
6 Feb 66	Star shaped light 25 degrees above horizon for about 30 minutes at Kitchen Vic	Astronomical
9 Feb 66	Light in N. sky 45 degrees above horizon for 3 hours at Melbourne Vic	Astronomical
20 Feb 66	Light moving rapidly from E to W for about 8 seconds Essendon, Vic	Meteor
21 Feb 66	Bright object at great height moving from S to N for 6 minutes at Richmond NSW	Satellite
28 Feb 66	Star shaped brightlight moving from SE to NW for about 3 minutes at Franklin, Tas	Satellite
2 Mar 66	Moving light high in sky for about 20 minutes at Hobart Tas	Satellite
26 Apr 66	Star shaped light moving for about 30 minutes at Toorak Vic	Incomplete data

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
5 May 66	Radar plot from Melbourne Control Tower held for 9 mins. Contact travelled 37 at 37 kts.	Dog fighting aircraft.
6 May 66	A light moving steadily in SSE direction near Ballarat	Satellite
8 May 66	Light reflection observed near Melbourne through field glasses. Est height 8,000' distance 20 n.m. Noted for 10 mins, stationary at first, then descended to 4,500'	Probably an Aircraft.
9 May 66	Circular shaped light with halo effect. Apparent slow movement. Seen near Sale, Vic for about 30 mins.	Astronomical
16 May 66	Object moving from E to W appeared to explode like a green flare and disappear. Duration 3 secs at Daly Waters.	Astronomical
17 May 66	Object observed near Daly Waters at 10.30 pm hovering between two stars for 10 mins.	Incomplete data
18 May 66	Met observer at Daly Waters saw object size and shape of met balloon at azimuth 243° elevation 23° altitude 40,000' moving 243°/46 kts. Noted reversal in track 1 - 1½ mins. Under magnification appeared to be two balloons touching. Time 9.45 a.m.	Probably met balloon from another station
25 May 66	Six red lights which appeared to be at 1500 ft. were sighted at Lismore NSW at 10 pm.	Unknown. Reported too late for investigation.
29 May 66	Silver object glinting in sun seen near Melbourne for 5 - 8 mins. Steady object similar to aircraft climbing.	Probably an aircraft.
26 May 66	Six red lights which appeared to be at 1500 ft. were sighted at Lismore NSW at 10 pm	Unknown. Reported too late for investigation.
2 Jun 6	Stationary light, which later appeared to move, was sighted at Lismore NSW at 9.50 pm.	Unknown Reported too late for investigation.
6 Jun 66	Unidentified lights, which appeared to move slowly were sighted at Lismore NSW at 9.50 pm for about 2 mins.	Unknown Reported too late for investigation
7 Jun 66	Luminous white cloud like sky writers' trail. Flash of light at front end. Time 0845-0905 at Wangaratta Vic.	Aircraft.
8 Jun 66	"Beeping" heard in early hours of morning by women in Wop Wop area.	Incomplete data
9 Jun 66	Incandescent white sphere with a blue tail was sighted at Port Augusta SA at 7.30 pm for about 2 secs.	Meteorite.
13 Jun 66	Near Springvale Vic at 8.05 p.m. Flashing red green and white light proceeding N to S seen for 5 - 10 mins.	Aircraft.
26 Jun 66	A moving red and white light was seen at Scale SA during p.m. hours.	Incomplete data.
Jun-28, 29, 30 July,1,2, 4,6,7,14, 22,23,26,27 31. Aug - 1,5.	During p.m. hours at Sellling, Vic, some flashing lights were seen; sometimes only a single light, sometimes in groups just above the ground. All reports from same source.	Lights of aircraft and vehicles.

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting.	Possible Cause.
9 Jul 66	Moving light sighted at Charleville Qld for about 5 mins. at 1.55 a.m.	Satellite
10 Jul 66	Moving light at high altitude was sighted at Karnell WA for about 3 - 8 mins. between 7.30 and 8.00 p.m.	Probable aircraft.
12 Jul 66	Moving bright light, at elevation approx 60° sighted Charters Qld for about 1 hr at 6 p.m.	Incomplete data.
26 Jul 66	Moving light at elevation about 45° sighted Paddington NSW for about 15 secs at 4.40 p.m.	Probable aircraft
17 Aug 66	Two moving red lights blinking steadily sighted Shepparton Vic for about 10 mins. at 8.40 p.m.	Aircraft
27 Aug 66	Aerial light followed by an explosion with general movement from W to E sighted Mallala PNG at 4.30 a.m.	Meteor
4 Sep 66	Stationary light near horizon seen at Yarram Vic for about 5 mins between 10 and 10.30 a.m.	Astronomical
4 Sep 66	Stationary light near horizon seen at Yarram Vic for about 5 mins at 4.15 a.m.	Astronomical
6 Sep 66	Light which moves from horizon to horizon seen at Hillie Park, Vic at 6.55 p.m.	Satellite
6 Sep 66	Light moving in the sky seen at Kilmeadick at 7.05 p.m.	Satellite
22 Sep 66	Bright light at elevation about 45°, seen at Gunnedah NSW for about 25 mins at 9 p.m.	Astronomical
6 Oct 66	Moving light at elevation about 20°, seen at Chadstone Vic at 8.10 p.m.	Probable balloon
7 Oct 66	Moving light at great height, seen at Murarie Qld for about 10 mins at 5 p.m.	Satellite
10 Oct 66	Light estimated moving from SE to NW seen at Laverton Vic at elevation approx 15° for 43 mins at 8.22 p.m.	Satellite
12 Oct 66	Very fast light moving from W to S seen at West Footscray Vic for about 5 - 10 mins at 8.35 p.m.	Aircraft
19 Oct 66	Slowly moving light, at elevation approx. 45°, seen at North Melbourne, Vic for about 5 - 10 mins at 7.45 p.m.	Probable met balloon
19 Oct 66	Moving light seen at Pymble NSW for about 5 mins at 8 pm.	Incomplete data
20 Oct 66	Moving light, at extreme height, seen at Flinders Bay WA at 1.30 a.m.	Incomplete data.
21 Oct 66	Stationary light, elevation approx 20°, seen at Cooley Vale NSW for about 5 mins at 9.10 p.m.	Astronomical
22 Oct 66	Moving light seen at Kangaroo Valley NSW for about 7 mins at 7.40 pm	Satellite
23 Oct 66	Light at elevation about 50° moving from S to N seen at West Pymble, NSW at 7 p.m.	Incomplete data
26 Oct 66	Moving light seen in Port Hedland WA area for about 15 mins at 7.55 p.m. About 1½ hours later a light was sighted for a short duration.	Met balloon
26 Oct 66	Seven WA cattle stations reported a moving object rising in the sky between 7.30 and 8.00 p.m.	Satellite.

The foregoing summary of information prepared in the public interest includes the final assessment of each sighting reached by Department of Air, Canberra and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible cause
12 Nov 66	Lighted object moving fast from N to S for about 10 Seconds at Brisbane, Qld.	Meteorite or satellite
22 Nov 66	Object moving from N to S for about 2 minutes at Daly Waters, N.T.	Probable met balloon.
22 Nov 66	Moving bright red light for about 6 minutes at Willaura, Vic	Aircraft
24 Nov 66	Light moving from W to E for 20 minutes at Brisbane Qld.	Incomplete data
27 Nov 66	Light with black mass on top during a severe electrical storm for 3-4 minutes at Eildon Weir, Vic	Electrical discharge phenomenon
10 Dec 66	Star shaped point of light moving S for about 3 mins at Camberwell, Vic.	Satellite
15-19 Dec 66	Very high light moving from W to E for 15-20 minutes at West Pymble, NSW	Satellite
26 Dec 66	Very high light moving from W to E for 5 minutes at Yarra Glen, Vic.	Satellite
30-31 Dec 66	Very high light in the sky, two sightings at Pingal Tas.	Satellites
4 & 6 Jan 67	Bright light moving from NW to SE for about 4 minutes each sighting at St Kilda Vic.	Satellite
6 Jan 67	Light flashing every 8-10 secs moving SE to NW at great height for 90 seconds at Narribri, NSW.	Tumbling satellite
11 Jan 67	Moving light at Coolac, NSW	Incomplete data
13 Jan 67	Lighted object moving W to E at about 1,000' for 7 seconds at Fawkner, Vic	Aircraft
13 Jan 67	Two red lights moving across sky for about 2 minutes near Camden, NSW	Aircraft
15 Jan 67	Light moving W across sky for 10 minutes at Springvale Vic.	Aircraft
17 Jan 67	Flash in sky, high speed descent of object, then puff of smoke for about 1 minute at Charleville, Qld	Atmospheric entry of meteor.
19 Jan 67	Very high light moving W to E for 45 minutes at Blackburn, Vic.	Satellite
21 Jan 67	Object seen accompanied by loud humming noise for about 1 minute at Maitland, NSW	Nearby debris airborne by Willy Willy
23 Jan 67	Moving lights, appearing and disappearing in low cloud conditions for about 20 minutes at Wombrek, Vic	Light reflections of nearby items.

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
4 Feb 67	Light moving SSW to NNE for 8 minutes at Eildon Weir, Vic.	Satellite
6 Feb 67	Dull red light moving W to E at great speed for 3 minutes at Dreamlea, Vic	Astronomical
12 Feb 67	Orange light for about 5 minutes near Dampier, WA	Incomplete data
13 Feb 67	Fiery object with tail for several seconds near Perth, WA (40 miles S)	Atmospheric entry of meteor or satellite
15 Feb 67	Object about 20-30,000 feet moving SW to NE for about 10-15 seconds near Townsville, Qld (30 miles S).	Aircraft
19 Feb 67	Fiery light which descended and disintegrated above ground seen for several seconds at Fernvale, Qld	Atmospheric entry of meteor
20 Feb 67	Bright light descended vertically for 15 seconds at Port Macquarie, NSW.	Atmospheric entry of meteor
21 Feb 67	Light moving from overhead to horizon near Macquarie Light, NSW.	Incomplete data
22 Feb 67	Lights moving W disappeared below horizon after 15 minutes at Box Hill, Vic	Aircraft
16 Mar 67	Red flashing light then bright white light for several seconds moving E at Picnic Point, Qld.	Aircraft
16 Mar 67	White light appeared from behind cloud and appeared to move in and out of cloud at Cooparoo, Qld	Light reflection on clouds
16 Mar 67	Light moving high from W to E for about 30 minutes at Malvern, Vic.	Satellite
17 Mar 67	Bright light with tail seen from aircraft above cloud for 3-4 seconds about 100 miles N of Brisbane, Qld.	Atmospheric entry of meteor or satellite
19 Mar 67	Star shaped light in W sky seen for about 40 minutes at Currajong, Vic.	Astronomical
21 Mar 67	Object moving from N to S for 4-5 seconds at Forrest Hill, Vic.	Light aircraft
1 Apr 67	Slow moving red light for about 10 minutes at Darwin, NT	Astronomical
12 Apr 67	Slow moving object high in sky for about 10 minutes at Caulfield, Vic.	Astronomical
17 Apr 67	Object sighted at 2000hrs and two at 2200 hrs at Minto, NSW	Incomplete data
25 Apr 67	Slow moving light in sky, SE to NW for about 7 minutes at Coolangatta, Qld.	Astronomical

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
3 May 67	Light moving across sky at about speed of aircraft for 5 minutes at Yarrambat, Vic.	Aircraft descending
5 May 67	White light which left white trail moved from NW horizon to SE for about 2 minutes at Howbray, Tas.	Atmospheric entry of meteor or satellite
6 May 67	Stationary light above horizon disappeared then re-appeared, but smaller in size, during 1 minute at Newnham, Tas.	Aircraft moving from observer
17 May 67	Star shaped object high in sky moving slowly NW to SE for about 1 hour at Thomastown, Vic	Satellite
22 May 67	Light moving N to SS disappeared behind cloud seen for 5 minutes at Kew, Vic	Aircraft
25 May 67	Object moving N. to SE appeared to slowly break up over about 30 seconds at Daly Waters, NT	Atmospheric entry of meteor or satellite
27 May 67	Object above horizon appeared as bright light moving slowly for 7 minutes at Yagoona, NSW	Met. balloon
17 Jun 67	Slow moving red light for about 15 minutes at Burrinjuck NSW	Incomplete data
24 Jun 67	Fire-like object about size of golf ball disappeared over horizon after 3 minutes at St Mary's NSW.	Astronomical
27 Jun 67	Between 2105 hrs and 2200 hrs, 21 separate sightings mainly over S and SE Victoria varying from 1 sec to 30 minutes referred to a bright star-shaped object which rapidly grew to about half full moon size. Most saw a ball of light, travelling horizontally across sky which slowly curved towards earth at shallow angle. Brilliant green or blue-green in colour during 75% of travel it then changed to "hot orange" or "reddish pink" culminating in a "whitish-yellow-orange" bright burst of colour before disappearing. A vapour trail persisted over final path which changed shape and disappeared after 15 minutes.	Atmospheric entry of large meteor
8 Jul 67	Stationary object unusually coloured, low in Western sky for about 30 minutes at Lindenow South, Vic	Light reflections on low cloud
14 Jul 67	Stationary light in W sky about 10 degrees above horizon for 10 minutes at Harbord, NSW	Met. balloon
15 Jul 67	Stationary light in W sky for short duration at Burrenjoey, NSW	Astronomical
17 Jul 67	Light above S horizon descended and disappeared after 30 seconds at Wollstonecraft, NSW.	Astronomical

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
20 Jul 67	Silvery object with trail descended at steep angle at Karoonda, SA. Duration unknown.	Atmospheric entry of meteor or satellite
22 Jul 67	Lighted object seen moving for 7 seconds at Kinglake West, Vic.	Incomplete data
26 Jul 67	Very high star shaped light seen for 45 minutes at Kalbar, Qld.	Astronomical
30 Jul 67	Large, steady, circular green light which disappeared into distance after 10 minutes at Muswellbrook, NSW	Aircraft
31 Jul 67	Light changing from orange to white to green which descended steeply with dull red sparks during 10 seconds at Coffs Harbour, NSW	Atmospheric entry of meteor or satellite
2 Aug 67	Red light larger than falling star which broke into pieces leaving trail during 10 seconds at Collaroy, NSW	Atmospheric entry of meteor or satellite
3 Aug 67	Lighted object moving across sky for 20 minutes at Melton South, Vic.	Aircraft
4 Aug 67	Light, high in sky, descending straight with smoke trail for 10 seconds at Dee Why, NSW.	Atmospheric entry of meteor
11 Aug 67	High bright light moving from S to N for 10 Seconds at Brookfield, Qld.	Satellite
11 Aug 67	Lights moving to NE and climbing for 5 minutes at Yarraville, Vic	Aircraft
15 Aug 67	Bright light above horizon in W sky for 5 minutes at Alberton, Vic.	Astronomical
16 Aug 67	Bright light above horizon in W sky for 11 minutes at Yarram, Vic.	Astronomical
16 Aug 67	Light above horizon in W sky for 3 minutes near Foster, Vic.	Astronomical
28 Aug 67	Light moving from S to NE at altitude for about 20 minutes at Bondi, NSW.	Aircraft
29 Aug 67	High bright light moving rapidly for about 5-12 seconds from SW to NE leaving trail. Four sightings at Ivanhoe Mac Leod, Rosanna and Foster in Vic.	Atmospheric entry of meteor.
1 Sep 67	High light in sky, moving W to E leaving trail, seen for 5-7 seconds at Mount Egerton, Vic.	Atmospheric entry of meteor
23 Sep 67	High light moving slowly for 3-4 minutes at Riverslea, Vic.	Astronomical
23 Sep 67	Small light, larger than a star, flashing orange to dull red, moving across sky for 2 minutes at Cooma, NSW	Aircraft

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
4 Sept 67	Flash of light moving downwards just above eastern sky near Melville, WA	Incomplete Data
9 Sept 67	Flash of light then an object moving slowly to the north west at Alice Springs, NT	Met balloon
12 Sept 67	Bright moving light with red and white light at rear near Bega, NSW	Aircraft
23 Sept 67	Rapidly moving object which seemed to break into smaller pieces at Donald & Watches, Vic	Atmospheric entry of meteor
8 Oct 67	Light at great height moving across sky at Perth, WA	Satellite
17 Oct 67	Trail with object in front at great altitude seen for 6 seconds at Gordon, NSW	Atmospheric entry of meteor
22 Oct 67	Bright light which appeared to move rapidly downwards sighted for 2 seconds near Darwin, NT	Atmospheric entry of meteor or satellite
22 Oct 67	Light at great altitude moving from northerly to southerly direction at Derwood, SA	Satellite
23 Oct 67	Light moving from Carlton towards Essendon at Carlton, VIC	Aircraft
24 Oct 67	Light moving near Two Mile Gully, Vic	Incomplete data
24 Oct 67	Light grey object moving to the south east sighted for about 15 seconds at Sunshine, Vic	Aircraft
24 Oct 67	Light at great altitude moving to the east sighted for about 7 minutes at Yarrk, Vic	Satellite
24 Oct 67	Object moving south disappeared into cloud sighted for 30 seconds at Grafton, NSW	Aircraft
29 Oct 67	Light moving just above horizon for 30 seconds near Fox Hill, Vic	Aircraft
4 Nov 67	Light at altitude moving from southerly to northerly direction sighted for 3 minutes near Altona, Vic	Satellite
10 Nov 67	Light moving rapidly from north to south at Gympie, Qld	Atmospheric entry of meteor
11 Nov 67	Object 50° above horizon moving south east at Paddington, Qld	Aircraft

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sightings	Possible Cause
13 Nov 67	Light above horizon near Wee Waree, NSW	Incomplete Data
19 Nov 67	Light sighted for 5 mins moving rapidly to the south east at Sandringham Vic	Atmospheric entry of meteor
19 Nov 67	Ten minute sighting of bright light moving towards the east near Ipswich, Qld	Satellite
21 Nov 67	Lighted object over Iron ore pellet plant Dampier, WA	Local Atmospheric conditions
22 Nov 67	Object moving in and out of cloud sighted for about 1 minute near Pilbara, WA	Aircraft
23 Nov 67	Lights moving from east to north west sighted for about 10 minutes near Melton South Vic	Aircraft
26 Nov 67	Lighted object moving along main road at about 25 mph which suddenly disappeared near Kimberley Downs Station, WA	Not known
29 Nov 67	Bright light moving slowly from south to north for about 5 minutes near Delta, Qld	Not balloon
29 Nov 67	Light moving from east to west at great speed leaving a trail sighted for two seconds at Darwin NT	Atmospheric entry of meteor
30 Nov 67	Object moving from east to west sighted for about 10 seconds near Port Hedland, WA	Aircraft
6 Dec 67	Bright light 15° above horizon in the east sighted for several hours at Ocean Bay, NSW	Astronomical
13 Dec 67	Bright light moving across sky sighted for about 30 minutes at Gympie, Qld	Satellite
15 Dec 67	Object moving from east to west at great altitude near North Fitzroy	Satellite
30 Dec 67	Starlike light moving from north to south and sighted for about 5 minutes at Brisbane, Qld	Satellite
31 Dec 67	Starlike object sighted for 30 minutes moving from west to east at Adelaide, SA.	Satellite
31 Dec 67	Object at great altitude moving from south west to north east sighted for 2 minutes at Cabramatta, NSW	Satellite
31 Dec 67	Light moving at great speed from south to north in Botany Bay area NSW	Atmospheric entry of meteor
1 Jan 68	Light moving rapidly across sky and breaking up into smaller lights at Northampton, Qld	Atmospheric entry of meteor

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
8 Jan 68	Object at great height moving from west to east sighted for five minutes near South Yarra, Vic	Satellite
14 Jan 68	Bright light with flashing red and green lights manoeuvring near Chadstone, Vic	Aircraft
15 Jan 68	Light moving from west to east at great altitude at Mitcham, Vic	Satellite
16 Jan 68	Red and green lights moving from west to east and climbing near Bolton South Vic.	Aircraft
17 Jan 68	Light moving from north to south sighted for about 30 seconds at Zillmere Qld	Aircraft
19 Jan 68	Object at great altitude moving towards the east sighted for 7 minutes at Panshurst NSW	Satellite
19 Jan 68	Light at height moving rapidly from west to east and breaking up into smaller lights at Ashfield	Atmospheric entry of meteor
20 Jan 68	Light with long trail moving rapidly from west to east for about 20 seconds at Wagga, NSW	Atmospheric entry of meteor
22 Jan 68	Object moving from east to west near Norseal Homestead, WA	Met balloon
27 Jan 68	Light like a star moving across the sky sighted for 15 minutes near Brahma Lodge, SA	Satellite
27 Jan 68	Light at altitude moving from north to south at East Sale, Vic.	Satellite
31 Jan 68	Light at great height moving from north to south east sighted for 5 minutes at Bolsans Bay	Satellite
6 Feb 68	Lights moving from south to north sighted for about 15 seconds at Perth, WA	Incomplete data
12 Feb 68	Light at great altitude moving towards south east for 10 minutes at Toorak, Vic	Satellite
13 Feb 68	Bright light in eastern sky sighted for about ten minutes near Chadstone, Vic.	Astronomical
13 Feb 68	Time 0030 hrs Duration 90 mins. Weather fine. Light moving from south to north at great altitude at Barmera, SA.	Satellite
20 Feb 68	Time 1940 hrs. Duration ½ minute. Weather fine. Light at great altitude moving from west to east at Cannon Hill.	Satellite
22 Feb 68	Time 1930 hrs. Duration 5 minutes. Bright light very high, moving towards the east in a straight line at Zillmere, Qld	Satellite

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of sighting	Brief Description of Aerial Sighting	Possible Cause
23 Feb 68	Time 0145 hrs. Duration several seconds. Weather 6/8 low cloud. Light in sky which appeared to move slowly away from observer at Corlingford, NSW	Mascot meteorological search light on cloud
8 Mar 68	Time 2030 hrs. Duration 5 secs. Weather fine. Light appeared to be falling at great speed at Yass.	Atmospheric entry of meteor
19 Mar 68	Time 2000 hrs. Duration approx. 40 minutes. Weather fine. Flashing red and green lights moving towards north west, at Sale, Vic.	Aircraft
21 Mar 68	Time 2055 hrs. Duration 5 minutes. Light moving north west then turning to the south and fading during the turn at Armidale, Qld.	Aircraft
24 Mar 68	Time 0100 hrs. Duration 10 minutes. Light accompanied by low humming noise travelling from west to east at Point Leo, Vic.	Aircraft
1 Apr 68	Time 1917 hrs. Duration unknown. Weather fine. Light at great height moving from south west to north east at Bacchus Marsh, Vic.	Satellite
9 Apr 68	Time 1910 hrs. Duration 5 minutes. Weather fine. Light moving north west then north at Williamstown, Vic.	Aircraft
9 Apr 68	Time 1905 hrs. Duration unknown. Weather cloudy. Light moving from west to east in a straight line at Thornbury, Vic	Satellite
10 Apr 68	Time 1850 hrs. Duration not known. Weather fine, 3/8 cloud. Flashing red light moving in various directions and being lost at times due to cloud at Williamstown Vic.	Aircraft
10 Apr 68	Time 1917 hrs. Duration 1 minute. Light moving in a straight line from west to east at Flinders Is.	Satellite
10 Apr 68	Time 1855 hrs. Duration unknown. Weather fine. White light at great altitude moving very rapidly from south to north at Williamstown, Vic	Atmospheric entry of meteor
12 Apr 68	Time 1900 hrs. Duration 10 mins. Star like object moving at great height at Manly, NSW	Satellite
22 Apr 68	Time 2030 hrs. Duration 5 mins. Bright light 5° above horizon moving in a straight line from north to south, at Toowoomba, NSW	Satellite
24 Apr 68	Time 0330 hrs. Duration 1-2 hrs. Light just above horizon moving upwards at very slow rate at Maffra, Vic	Astronomical
25 Apr 68	Time 1800 hrs. Duration 2 minutes. Weather fine. Light moving in a northerly direction at Longwarry Vic.	Aircraft

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
25 Apr 68	Time 0430 hrs. Duration about 1 hour. Light about 10° above horizon moving extremely slowly upward. at Wayfield, Vic	Astronomical
1 May 68	Time 2200 hrs. Duration 1 minute. Weather fine. Light moving towards the east disappearing over the horizon at Smithfield, NSW.	Satellite
3 May 68	Time 2046 hrs. Duration 2 mins. White light moving north along Tamar, then turned red and moved off to left at Trevallyn, Tas.	Aircraft
4 May 68	Time 0800 hrs. Duration 2 mins. Dull white light flashed brightly twice moving east at Launceston, Tas.	Aircraft with sun reflecting off fuselage
9 May 68	Time 1850 hrs. Duration 5 mins. Flashing lights moving W to S at Parkside, SA.	Aircraft
10 May 68	Time 1855 hrs. Duration 2-3 secs. 5 lights moving in straight path to S.W. at Queenstown, SA	Aircraft
11 May 68	Time 0510 hrs. Duration 30 secs. Orange light Stationary then moved to West at Clapham, SA	Aircraft
17 May 68	Time 0700 hrs. Duration 7 mins. Light circled water tower in dark overcast then hovered over approaching car before disappearing at Warradale SA.	Optical illusion from car lights in overcast
18 May 68	Time 2130 hrs. Duration about 4 mins. Starlike object moving N to S at Castlemaine, Vic.	Satellite
19 May 68	Time 2050 hrs. Duration about 1 sec. Lighted object on straight path moving rapidly to N.W. at Fitzroy, Vic	Meteor entry
23 July 68	Time 1730 hrs. Duration unknown. Bright yellow/ orange light turning to black ball falling rapidly at South Yarra, Vic	Aircraft passing from direct sunlight on descent.
24 July 68	Time 1245 hrs. Duration 10 minutes. Circular silver object stationary then moving quickly S.E. to N.E. at Dee Why, NSW	Met balloon from Mascot
31 July 68	Time 2325 hrs. Duration 3-9 minutes. Orange/ yellow sphere moving E to W disappeared over horizon at Henley Beach, SA.	Optical illusion in rain and cloud
31 July 68	Time 1827 hrs. Duration 2 minutes. Small bright light moving at 'aircraft' speed from city towards Dandenong. Seen from Mitcham, Vic	Aircraft
July 68	Reported in October. Time 1130 hrs. Duration 10 mins. Bright light, like polished silver, in shape of Aircraft wings at Chatswood, NSW.	Aircraft in sunlight

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
3 Aug 68	Time 0625 hrs. Duration about 5 minutes. White light turned into flicking red lights, appeared stationary then moved towards Melbourne at Forest Hill/Templestowe, Vic.	Aircraft
9 Aug 68	Time 2045 hrs. Duration 10 minutes. White and flashing red lights over Phillip Bay, NSW.	Star observed through haze
11 Aug 68	Time forenoon. Duration 5-10 minutes. Silver metallic object appeared to separate from aircraft at Cronulla, NSW.	Object separating from aircraft
11 Aug 68	Time about 1845 hrs. Duration 2 minutes. Brilliant aircraft type light from S.W., no noise, at Dandenong, Vic.	Aircraft
11 Aug 68	Time about 1915 hrs. Duration 5 minutes. Flashing red light moving E to W at aeroplane speed at Trafalgar, Vic.	Aircraft
12 Aug 68	Time 0516 hrs. Duration 3-4 secs. Bright yellow/orange light from N to S at Leederville, WA.	Aircraft
17 Aug 68	Time 2045 hrs. Duration 3-4 minutes. Three bright orange/red lights joined together moving W to E at Strathfield, NSW.	Aircraft
18 Aug 68	Time about 1830 hrs. Duration 35 minutes, Brilliant blinking light, one large and two small, stationary and no noise at West Pymble, NSW.	Incomplete data but probable aircraft
18 Aug 68	Time about 2000 hrs. Duration unknown. Light moving S. to S.E. size and shape of large star at Wickham, NSW	Satellite
18 Aug 68	Time 2015 hrs. Duration 4 secs. (2 sightings) Bright light in straight descent, very fast, at Warrandyte, Vic	Meteor
19 Aug 68	Time 1810 hrs. Duration 5-10 mins. Bright light N to S. Jet noise and trail of sparks at Strathfield, NSW.	Aircraft with landing lights on
21 Aug 68	Time 1700 hrs. Duration 30 minutes. Light like pale star moving slowly to E. at Woodville, SA	Incomplete data but probable aircraft
23 Aug 68	Time 0140 hrs. Duration unknown. Aircraft shaped object with row of lights and glow at rear moving at "tremendous" speed from Cooper to Mascot.	Aircraft landing at Mascot
25 Aug 68	Time 0100 hrs. Duration 1-2 minutes. Bright white and intermittent red lights moving N to S about 'jet speed' with beam of light to ground at West P. ble, NSW.	Aircraft
25 Aug 68	Time 2000 hrs. Duration about 12 minutes. Light moving in triangular pattern. Lost for 5 minutes then reappeared moving to S. at Church Point, NSW	Two aircraft, one in landing pattern, and one departing for Melbourne

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
27 Aug 68	Time 1855 hrs. Duration 1 hour. Bright light manoeuvered in sky. Object appeared and disappeared and seemed to repeat pattern at Box Hill, Vic.	Aircraft
28 Aug 68	Time 2030 hrs. Duration 30 secs. "Jet noise" and circular orange light with spark trail at Toowoomba, Qld.	Atmospheric entry of meteor or satellite
1 Sept 68 and 15 Sept 68	Times 1955 and 0444 respectively. Duration 1½ minutes and unknown. Bright gold/red light bigger than star at Rabaul TPNG.	Satellites
4 Sept 68	Time 0347 hrs. Duration 30 secs. Light blue flame with sparks travelling W to E at Rockhampton, Qld	Atmospheric entry of meteor or satellite
9 Sept 68	Time 1628 hrs. Duration 1-2 secs. RAAF Sabre pilot saw "Shining light" travelling at high speed over Avalon, Vic. Fine clear afternoon.	Refraction of light in canopy
15 Sept 68	Time 1520 hrs. Duration 3 minutes. Three delta shaped objects one bright, metallic, two dull, moving S to N over Daly Waters, NT.	Aircraft
28 Sept 68	Time 1910 hrs. Duration 3 minutes. Three round orange lights, viewed through car window, lights stationary and in line at Kurnell, NSW.	Reflection of street lights in car window
8, 10 & 11 Oct 68	Time about 2345 hrs. Duration 35 minutes. White light changing to red and blue occasionally moving slowly NW in straight path over Launceston, Tas.	Satellite
18 Oct 68	Time 2347 hrs. Duration several minutes. Aircraft lights seen and tracked on radar in path of RAF aircraft at Darwin, NT.	Unidentified aircraft
19 Oct 68	Time 1640 hrs. Duration about 3-5 minutes. Bright light moving to N. NW at Deagon, Qld.	Aircraft
20 Oct 68	Time 2112 hrs. Duration 15 secs. Silver-grey object following and then veering from aircraft at Mcleod, Vic.	Particle separation from aircraft
20 Oct 68	Time 2130 hrs. Duration 30 secs. Explosion then light falling slowly, trailing smoke at Brisbane, Qld.	Flare used from previous day's fireworks display
4 Nov 68	Time 2240 hrs. Duration 5 minutes. Bright light like star, from S.W. to N then S.W. over Launceston, Tas.	Satellite
7 Nov 68	Time 1440 hrs. Duration 1 minute. Object skimming about 4 feet above ground then rising into air behind house at San Souci, NSW.	Childs toy
12, 13 & 21 Nov 68	Times 2230, 2140 & 2055 respectively. Duration varying from 20-60 minutes. Bright light moving W to E over Avalon, Vic also seen by air traffic control & Meteorology section at Laverton	Atmospheric "Space debris"

The foregoing summary of information prepared in the public interest, includes the final assessment of each sighting reached by Department of Air, CANBERRA, and it is regretted that no further correspondence can be undertaken on this subject.

Date of Sighting	Brief Description of Aerial Sighting	Possible Cause
11 Nov 68	Time 1220 hrs. Duration 53 minutes. Radar contact tracked by automatic radar. Travelled towards RAAF Darwin, NT and then veered S.W. at 17-25 kts. No visual sighting.	Flock of birds
25 Nov 68	Object embedded in ground at Normanton, Qld	Part of Satellite
26 Nov 68	Time 2030 hrs. Duration 5-10 minutes. Luminous pink sphere moving east then S.E. Surrounded by aura of red and green at Coburg, Vic	Met balloon
30 Nov 68	Time 2200 hrs. Duration 4-5 minutes. Large deep yellow light moved slowly and intermittently towards observer then veered south at Evandale, Tas.	Met balloon

provided in a lacquer. Identification is possible since the slip coating was color coded (red for Revere and, I believe, blue for Reynolds and green for Aluminoid).

Generally speaking, the slip coat was last used in the manufacture of chaff units RR 39/AL and RR 46/AL. Your sample dipoles (based on 4-inch) could have come from other unit dipoles. These units were last produced in 1955-56 although a similar supply was reworked in 1963-65. Since that time no crude supply was reworked for test purposes. It is believed small bits have been produced for test purposes. It is possible that some of this material was dropped by aircraft.

However, associating the chaff with a reported sighting of a UFO leads us to expect another source. The chaff in question has been and is being used as a payload for sounding rockets and balloons. These devices are used to carry the chaff payload up to high altitudes and then the material is released for radar tracking. In some balloon devices, the chaff dipoles are supposed to remain within the balloon but occasionally they fall free.

Quite a few agencies employ these devices, among them Sandia Corp., Albuquerque, New Mexico and Dewey-Almy Chemicals Corp., Cambridge, Mass. Perhaps they are actually a sounding device launch with the time of your reported sighting.

We can source you, however, that the chaff in question was manufactured in Brooklyn, New York, USA and not in some remote corner of the galaxy.

Conclusion:

The material consisted of radar chaff dipoles manufactured by Revere Copper and Brass, Inc.

Case 4
Greenwich +3
Fall 1957
Investigator: Craig

Abstract:

A small piece of corroded magnesium metal, widely acclaimed as a fragment from an alien vehicle which exploded near a beach in Greenwich +3, was analyzed. The analysis disproved claims that the material was of greater purity than earthly metallurgical technology was capable of in 1957. Claims of extraterrestrial origin of the magnesium are thus based solely upon hearsay information which was never authenticated.

Background:

UFO writings commonly refer to pieces of ultra-pure magnesium which reportedly were once part of an alien vehicle which exploded over a beach in Greenwich +3 in 1957. According to the accounts, the claim of alien origin was supported by the fact that the magnesium was of a higher purity than human technology was then capable of producing; therefore, the material must have come from another culture. These claims are developed in great detail in *The Great Flying Saucer*

Note by Coral E. Lorenzen (1967). Mr. and Mrs. Lorenzen generously offered their magnesium samples to us for analysis.

The story of the origin of the samples had not been satisfactorily located. A newspaper item, written by a society columnist purported a letter which the columnist allegedly received, also with fragments of metal, from an "admirer" who could not be identified because his signature was illegible. The letter identified its writer as a fisherman who saw a flying disc approach the beach at unbelievable speed, turn sharply, and glide. The disc reportedly disintegrated into thousands of burning fragments, some of which fell into shallow water where they were recovered by the fisherman, who said the some of these fragments accompanied the letter.

The fisherman has never been located or identified, and it has not been established that the columnist actually received the letter from a third party.

An interested civilian obtained the metal from the columnist and, according to his account, took it to the Mineral Production Laboratory of the Agriculture Ministry of the country where analysis showed it to be magnesium of greater purity than human technology could produce.

Investigation:

It was impossible to verify any relationship between the magnesium fragments and an UFO sighting. However, the degree of purity of the magnesium could be determined and since extra weight has been given to the claim that the material was of phenomenal purity, the project decided to have the Lorenzen sample analyzed.

Purified magnesium normally contains few impurities in sufficient quantity for detection by emission spectroscopy. An indication of the degree of purity attainable by known technology in 1957 was contained in a report of analysis (date 23 May 1957) of magnesium which had been purified by eight successive sublimations. The analytic information furnished by Dr. R. S. Busk, Research Director, Metal Products Department, Dow Chemical Company, showed only Al, Zn, Cu, and Ni present in detectable quantities as listed below, and given in parts per million of the sample. All other elements shown in the report were not present in quantities sufficient to be detected. < merely indicate the limits of detectability for each element by the analytical method used.

Table

	PPM		PPM
Al	2	Sn	<10
Cu	<10	Zn	2
Fe	<4	Be	<1
Mn	<3	Ca	8
Ni	<4	K	<3
Pb	<3	Na	1
Si	<10	Sr	<3

Dick informed us that his company has supplied samples of sublimed magnesium on request for at least 25 yrs, and sent us a sample of triply-sublimed magnesium for purity comparison with the spectrum.

Since we assumed we would be looking for extremely small quantities of impurity in the samples, we chose to analyze the samples by neutron activation, the most sensitive analytical method currently available. The work was done by the Research and Methods Evaluation Group, Alcohol and Tobacco Tax Division, Internal Revenue Service, under the direction of Mr. Maynard T. Pee. The neutron irradiation and subsequent gamma spectrometry were observed by the project investigator and original analytical data are retained in project files. Results of neutron activation analysis showed the impurities listed below, given in parts of impurity per million parts of sample (PPM). Elements shown as N.D. (not detectable) were not present in sufficient quantity for detection. Limits of error in all cases are based upon most extreme estimates of probable error, and the uncertainty indicated probably is very generous. Figures for the first five elements shown were obtained by direct gamma spectrometry after neutron activation. Cu, Sn, and Sr values were obtained by gamma spectrometry after radio-chemical separation of the elements. It is obvious from these results that the magnesium is not nearly so pure as the Dow product.

Table

	Dow Mg	*UFO Mg*
Mn	4.8 ± 0.5	$15.0 \pm 5.$
Al	N. D. (<51)	N. D. (<10)
Cu	$5. \pm 1.$	$980. \pm 100.$
Sn	2.0 ± 0.5	N. D.
Sr	5.9 ± 1.2	$12.0 \pm 10.$
Cr	0.8 ± 0.2	3.1 ± 1.0
Fe	N. D.	$180. \pm 20.$
Ni	N. D.	$590. \pm 100.$

For the neutron activation analysis, a small portion of the sample was broken off, and leached in HCl solution to remove surface impurities. After washing, this portion (which then had a bright metallic surface) was analyzed. The absence of Cl in the post-irradiation gamma spectrum showed both that Cl was not present in the sample itself and that washing of the leached sample was complete.

The quantity of Mg^{27} isotope produced by neutron activation of Mg^{26} was also measured. This measurement showed that the magnesium isotopic ratio in the sample not differ significantly from that of other natural magnesium samples.

While the sample proved not to be especially pure, the relatively high strontium concentration was particularly interesting since Sr is not an expected impurity in magnesium. Dr. Dick knew of no one who intentionally added Sr to com-

nerial Mg. Additional work was therefore undertaken
determine if the sample, while not pure, might nonetheless
tongue. The additional analytical work consisted of microper
analysis and metallographic examination, and was done
Dr. Bush's staff at the Dow Metallurgical Laboratory. Ag
the work was monitored by the project investigator.

Dr. D. R. Beaton's report of this work states:

> The electron microprobe analysis of the Mg/Sr/O revea
> that Sr and Zn were present in extremely low concentrations
> were not present in detectable localized regions of high con
> trations. This does not preclude the possibility of a fine degree
> of precipitates. The metallographic examination of the
> source (magnesium metals [illegible]) by H. Bush sho
> with the probe results and the known solubilities of Sr and
> in Mg suggests that these elements are present in solid solu

Metallographic examination showed large, elongated
grains, indicating that the metal had not been work
after solidification from the liquid or vapor state. The
structure was thus not consistent with an assumption that
sample had been part of a fabricated metal object. Ra
quenching of a melted fragment was not indicated.

Since the strontium apparently had been added intentio
ally during manufacture of the material from which the sam
came, Dow Metallurgical Laboratory records were checked
see if such material had been produced in the past by that p
ticular laboratory. The records revealed that, over the yea
experimental batches of magnesium alloy containing fro
0.1% Sr to 40% Sr were produced. As early as 25 Marc
1948, the laboratory produced a 700 gm. batch of magnesiu
containing nominally the same concentration of Sr as was co
tained in the sample.

Conclusion

Since only a few grams of the magnesium are known
exist, and these could easily have been produced prior to 19
by common earthly technology, the composition and meta
lographic characteristics of these samples themselves reve
no information about their origin. The mere existence of th
samples cannot serve to support an argument that they
fragments from material of extraterrestrial origin.

Since none of the additional information about this sam
other than hearsay, it is not possible to establish any relatio
ship between the small pieces of magnesium and a "flying sa

ERIC LAW,
394 HUNTINGDALE RD.,
CHADSTONE,
VICTORIA, 3148

12th May, 1969

The Minister of Immigration,
The Right Honorable B. M. Sheddon.

Dear Sir,

My name is Eric Law and I am a constituent in your electorate. I bring a matter to your attention which my friends and myself consider very important. The subject is 'Unidentified Flying Objects' (UFO's).

We are not, as yet, members of any civilian UFO research organization. I have followed with interest the UFO mystery over the past few years, and I am now reasonably informed on the subject.

It has been confirmed by various authorities that UFO activity is gradually increasing all over the world. Although thousands of people, many of them eminent people, have witnessed these craft, there exists official denial or censorship of information regarding the sightings. Some of the explanations given to the public have been preposterous indeed.

Apart from the fact that these craft have been pursued by USAF armed interceptors, tracked on radar, and caused electromagnetic interference with television and radio, definite physical evidence of their existence has been found and analysed by scientists. I give two examples briefly: One case, made public, involved the examination of fragments from an exploded UFO in 1957. A metallurgical analysis by Dr. Luisa Barbosa of the Spectrographic Section of the Mineral Production Laboratory of Brazil showed the fragments to be 100% pure magnesium. It was at that time beyond our technology to produce 100% pure magnesium.

Mr. Wilbert Smith, a respected scientist, headed the Canadian research project in the field of UFO's. Speaking on the subject of Unidentified Flying Objects before the Illuminating Engineering Society, Canadian Regional Conference, at Ottowa on January 11, 1959, Wilbert Smith said: "Various items of 'hardware' are known to exist, but are usually clapped into security and are not available to the general public".

/2.

554/1/30

Little information has been given out by the air forces, and governments of the world, however, much has been gathered by civilian investigators. Reports and books are numerous on the subject.

As Australians we are naturally more interested in the Australian Government's attitude on the matter, so we have written this letter to you, Sir, in expectation of receiving some answers to the following questions:

(a) Does the Government have a policy on UFO's?

(b) Does the Government regard UFO's as serious business?

(c) Has the subject ever been openly debated in Parliament?

(d) Is it the Australian Air Force's responsibility alone to investigate UFO sightings, and issue official explanations on them?

(e) If the Government has classified information concerning UFO's, what are it's reasons for not making the information public?

Please reply to us at your earliest convenience.

Thank you,
Yours sincerely,

M. Wilkinson, Bank Officer, (UFO Eye Witness)

MINUTE PAPER

554/1/10

(This side only to be written on)

Subject: UFO'S - REPRESENTATIONS TO THE MINISTER

Sec'd O Air

1. Answers to the questions raised by Mr S. Lee are as follows:

a. Yes;

b. Yes - often more serious than the authors of the reports treat them;

c. To the best of our knowledge - No;

d. Yes - all reports and investigations are classified 'Restricted', but summaries of all reports, with the possible exception, are readily available from RAAF Directorate of Public Relations. Enquiries should be sent to them for attention PR2. These summaries are compiled every six months (one is in the process of present) and contain a brief of all reports received. A copy of the summary to December 1968 is attached.

e. No classified information concerning UFO's is held by the RAAF.

2. As you are probably aware the Department of Air is concerned solely with any possible threat to Australian security and does not go into detailed scientific investigations of UFO reports.

3. The United States has had a team of scientists, under Dr Condon, investigating UFO's in America for some years. Last year the study was closed, and the report was published as a book in paper-back form. This report contends that there is nothing of an inter-planetary nature occupying American air space. A copy of the report is held in this directorate.

4. A copy of the Condon report on the magnesium alloy case is also attached, and it appears that Mr Albert Smith did not represent the Canadian Government in its official study of UFO's in Canada.

UNUSUAL AERIAL SIGHTING REPORTS

1. In an attempt to obtain slightly more scientific data on sightings, the Defence Science Section has requested that the following report forms be used.

2. The use of these forms will enable a decision to be made by Defence Science personnel as to whether the sighting warrants further investigation. As Defence Science are the advisors on the reports it would be appreciated if the use of the new form could be instituted as soon as possible.

3. To be of value all questions must be answered in writing, as a dash conveys no information at all. On the spot evaluation and some indication of the nature of the occurrence is necessary as this office has no first hand knowledge of the situation and therefore is not in a position to make a satisfactory "questimation" on the cause.

(T.W. MURPHY)
Wing Commander
For Director of Air Force Intelligence

RESTRICTED

REPORT OF UNUSUAL AERIAL SIGHTING

Part I - Report by Observer

(As a preliminary to completing this form, the observer is invited to describe the sighting in his or her own manner, using either separate sheets or the back of this form.)

1. Name of observer.....Age.....

2. Address of observer.....

.....Phone.....

3. Occupation of observer.....

4. Date and time of start of observation.....

How certain is the date?.....

How accurate is the time of start?.....

5. Duration of observation.....

How accurate is your estimate?.....

6. Observer's location at time of sighting.....

.....

How familiar is observer with this locality?.....

7. Weather conditions at time of observation.....

.....

8. Describe any aids/equipment used in the observation.....

.....

9. Where was object first observed:

(a) Relative to your surroundings.....

.....

(b) angle of elevation.....

(c) compass angle bearing.....

(d) how accurate are these estimates.....

10. What first attracted observer's attention?.....

.....

11. If there was more than one light/object:

(a) how many were there?.....

(b) in what formation were they?.....

12. What was the colour of the light or object?.....

13. What was the brightness? (compare with full moon or common light source at a stated distance, e.g. ordinary street light at 100 yards).....
.....

14. What was the apparent size at nearest approach:
    (a) relative to Venus or Moon.....
    (b) relative dimensions in inches at arm's length (about 20 inches from the eye).....

15. What were the bearing and elevation angles at nearest approach and how were these values assessed?.....

16. Was any method of propulsion obvious?.....

17. Describe any sound heard, including changes in pitch and intensity.....
.....

18. What was the maximum and minimum angle of elevation (or height, if an estimate can be justified)?.....

19. What was the maximum and minimum angular velocity (or speed, if an estimate can be justified)? If necessary, compare with the movement of familiar objects at stated distances.....

20. Give duration of any stationary phases.....

21. Describe any deviations or manoeuvres.....

22. Describe any trail of exhaust, vapour or light seen.....

23. Where was object last observed:
    (a) relative to your surroundings.....
    (b) angle of elevation.....
    (c) compass angle bearing.....

24. What was the manner of its disappearance?.....

25. Do you know of any associated physical evidence (such as fragments, photographs, scorching, ground indentations, residual magnetism or radioactivity etc).....
.....

26. State any training which enables observer to be reasonably certain of his/her ability to estimate angles and angular velocity.....
.....

27. How many witness to the sighting?.....

28. Do you know of witnesses to similar sightings in the area?.....

29. What natural phenomenon (or phenomena) would be nearest to explaining your observation?.....

30. What are your main reasons for excluding this explanation?.....
.....

31. Please sketch the light/object with all details. If appropriate, sketch position and/or movement of object in relation to your surroundings. Use back of form, if needed.

SLR
65/1789

[illegible] October, 1966

Dear Sir,

I wish to ask a few questions concerning U.F.O.'s, or Flying Saucers.

I am an active member of a number of U.F.O. clubs, in the Flying Unidentified Flight Objects research society (where President holds a Bachelor of Science degree). I hold a position on the committee leader of the mapping section. I am also a signings investigation officer.

I have 20 personally investigated sightings, including 2 from England. Only 2 or 3 of these sightings have been reported to other investigating bodies, and only 1 of the 20 is recorded as a hoax.

I have spent 3 years trying to plot flight routes of U.F.O.'s. I have finally worked out from about 100 sightings covering mainly A.C.T., with a few from Victoria and Queensland, a geometrical grid which the U.F.O.'s seem to use. But a lot of work is needed to confirm whether this grid actually exists.

I know that the Department of Civil Aviation did at one stage, (at least in 1955) seriously investigate U.F.O. sightings, and may even still do so.

Could you please tell me if the D. of C.A. still investigates U.F.O. reports?

Is there any way I could get copies of sightings?

If it is permissable, could you tell me the range of the radar at Mascot Airport?

Was there any radar readings of U.F.O.'s on:-

January 21st, 1966.

January 22nd, 1966.

August 25th, 1958.

October 11th, 1965.

October 13th, 1965.

Also, could you please find out if there was a report of an aeroplane (I think it was a Viscount) chasing, or which saw a red and white U.F.O. above South Barragunga Valley area on the night of August 27th, 1966.

I am 19, do not regard myself as a crackpot, and believe in the serious, scientific research of U.F.O.'s.

I realise you may not be able to help me at all, but any help would be greatly appreciated. Hoping to hear from you soon,

Yours sincerely,

Ray Withnell.

Dear Mr Allen,

1. In reply to your letter dated 24th August 1968 requesting information concerning U.F.O. sightings at Kalgoorlie, W.A. The RAAF has had no notification of these sightings and can therefore not help you in this particular instance. As all reported sightings of U.F.O's are forwarded to this Department it seems that an official report and subsequent investigation have not been made.

2. To help you in your project there is enclosed a brief summary of all reported sightings from January 1960 to May 1963.

Yours sincerely

Flt-Lieut G. Martin,
R.A.A.F. Base,
Pearce,
Western Aust.

Dear Mr. Martin,

I have addressed this letter to you as I do not know the name of your department.

I am writing in connection with a recent U.F.O. sighting near Kalgoorlie by two commercial pilots, Mr. G. Smith and Mr. W. Gordon.

For some weeks I have been investigating U.F.O. reports in Tasmania and attempting to build up a record of all Tasmanian sightings. I have only begun as yet, but the reports I have investigated have made me very curious as to the nature of these objects. However I do not want to restrict things to Tasmania alone, and hence would request, if it is possible, any information possible on this sighting, including, as far as is allowable, the results of your investigation.

I am a teacher of science and mathematics at the above High School.

Yours faithfully
Neil A. Allen.

2. Address of observer.....

.....PHONE.....

3. Occupation of observer.....

4. Date and time of observation.....

5. Duration of observation.....

6. Observers location at time of sighting.....

7. Weather conditions at time of observation.....

.....

8. Describe any aids/equipment used in the observation.....

.....

9. Where was object first observed? (eg, overhead, coming from behind a hill, over the horizon). .....

.....

10. What first attracted observer's attention? (eg, light or noise).

.....

11. Did object appear as a light or as a definite object?.....

.....

12. If there was more than one object:-

(a) how many were there?.....

(b) in what formation were they?.....

13. What was the colour of the light or object?.....

14. What was its apparent shape?.....

15. Was any detail of structure observable?.....

16. Was any method of propulsion obvious?.....

17. Was there any sound?.....

18. What was its height? (or angle of elevation).....

19. What was its speed? (or angular velocity).....

20. Was the object stationary?.....

21. What was the direction of flight with reference to landmarks or points of the compass?

.....

22. Did the object remain on a straight path, deviate, or manoeuvre at all?

.....

23. Was any trail of exhaust, vapour, or light seen?.....

.....

24. Where did object disappear? (eg. in mid-air, behind a hill, over the horizon)

.....

25. Do you know of any physical evidence? (such as fragments, photographs, or other supporting evidence)

.....

26. Have you observed any unusual phenomena previously?.....

27. If so, give brief details of incident(s).....

.....

28. State any experience which enables observer to be reasonably certain about the answers given to 18 and 19.

.....

29. Are you a member of any organisation interested in aerial phenomena?

.....

30. Name and address of orgainsation.....

.....

31. Any additional information which relates to the sighting.

.....

.....

.....

.....

— 4 JUN 1968

(10)

Mikoiana stated that, whereas 201 Australian soldiers have died during the whole Vietnam war, it is estimated that 3,300 persons will die on Australian roads during 1968? Does the Minister agree that many protesters against the war in Vietnam have their priorities badly mixed up?

Mr SINCLAIR—I am not in a position to say how many Australians have been killed or injured in the course of the war in Vietnam. It is true that, having regard to the number of fatalities on our roads last year, we can expect that more than 3,300 people will be killed on our roads this year. The conclusion drawn by the honourable member from the comparison of fatalities in Vietnam and fatalities on our roads speaks for itself. Naturally every member of the Australian community is very concerned at the high incidence of fatalities on our roads. A considerable measure of publicity is given to this problem. One sometimes wonders whether, in considering their order of priorities, members of the Opposition have as much concern about fatalities on Australian roads as they have about their explanations of their understanding of the war in Vietnam.

SUPERANNUATION

Mr GRIFFITHS—I direct a question to the Prime Minister as Leader of the Government. Will Cabinet, prior to the introduction of this year's Budget, review the financial plight of superannuation pensioners in the light of increasing costs and their falling standard of living? Are superannuitants receiving net pensions of upwards of $60 a week much worse off financially than other pensioners receiving $40.50 a week plus fringe benefit of tax relief, free pensioner medical service, Postal Department concessions and concessions in respect of rates and travel? If in its financial proposals for 1968-69 the Government does not alter the means test, will the Prime Minister consider the desirability of providing research relief and free hospital and medical services for recipients of superannuation, thus eliminating a long-standing anomaly?

Mr GORTON—The honourable member has asked whether Cabinet will give consideration to a matter of policy at a particular time. Announcements as to policy are the responsibility of Cabinet alone. I understand subject not appropriate to be dealt with at question time.

UNIDENTIFIED FLYING OBJECTS

Mr STOKES—I ask the Minister for Air a question which relates to representations which I have made to him on behalf of the Commonwealth Aerial Phenomena Investigation Organisation, requesting a government grant to assist with research into unidentified flying objects. Has the Minister seen recent Press reports of sightings of unidentified flying objects in the Wimmera district of Victoria? Is he in a position to say why no some Commonwealth assistance in this matter may be expected?

Mr FREETH—I have acknowledged receipt from the honourable member of representations seeking Commonwealth assistance in the investigation of reports of unidentified flying objects. This matter is being considered. I cannot undertake to give the honourable member very great encouragement, because, as far as government are concerned, no precise determination has ever been made as to where science fiction begins in relation to reports of unidentified flying objects or to what extent the reports are related to reality.

Mr Stokes—The United States of America is making investigations.

Mr FREETH—I know that far more formalised investigation of this matter is proceeding in the United States. I hope to be able to give the honourable gentleman a reply to his representations in the near future.

AUSTRALIAN SERVICEMEN KILLED IN VIETNAM

Mr FARRIS—I ask the Minister for the Army a question. Is it a fact that the Army has three or four different scales of burial costs for Australian servicemen killed in Vietnam and returned to Australia for burial according to whether the Army wholly arranges the burial, whether the parents arrange a non-military funeral or whether the parents or relatives hold a private funeral? Is a special rate allowed for the burial of officers?

→ DAF! (Mr H. Cattell)

UNIDENTIFIED FLYING OBJECTS - CONFERENCE

Minister (through Secretary)

1. At folio 20 on this file is a request from the Secretary of the Canberra U.F.O. Research Society for an officer of the RAAF to give a talk at a final public session to be held next week-end in Canberra during the Third Conference of the Commonwealth Aerial Phenomena Investigation Organisation.

2. The specific request made has been that an officer not only attend, but also bring with him a synopsis of UFO sittings investigated by the RAAF to date.

3. This particular request does raise some considerable problems which may be summarised as follows:-

a. There is difficulty in finding a suitable officer to attend for the purpose. Under present arrangements the Directorate of Air Force Intelligence is the Directorate which is responsible for the co-ordination and investigation of Unidentified Flying Objects Reports.

b. Primarily the Department of Air and the RAAF's interest in flying objects has been concerned with the Defence (Air) aspects of the Commonwealth and has not been concerned with any other aspects related to say the scientific nature of such sittings.

c. There does not appear to be any other Commonwealth Agency or organisation involved in this matter, and subsequently this Department has become the "Commonwealth authority" on UFO sittings, although as I say its prime interest has been with Air Defence aspects in particular.

4. In 1957 Mr Roberts gave an address to the Ballarat Astronomical Society, and a copy of this paper at the time is attached in the material being sent to Mrs Klein. Mr Roberts is still in the Department with the Operational Research Office. However it is not part of his responsibility to be associated with this particular subject, and he has not been involved for the last three years.

5. The possibility of an officer from the Directorate of Air Force Intelligence being sent has been considered, but to send an officer from this Directorate, underlines that our interest in this subject is that associated with Air Defence/Intelligence aspects, and this could cause some problems and lead to some unwanted publicity.

6. Taking all factors into account at this stage, the reply at folio 21 attached has been prepared on the basis that an officer cannot be made available, but that the attached material might be useful to the Conference. This reply is accordingly referred for your signature.

Resp. 1a 754/1/30

.../2

7. It is intended however to take up further the question of Commonwealth responsibility in this particular subject with other Commonwealth departments, e.g. Defence, Supply, Education and Science, Prime Minister's Department etc, to see whether some other Commonwealth Agency is better placed to assume responsibility for Unidentified Flying Objects. At the same time we would maintain our interest in the matter and work with any other Commonwealth agency who is considered to be more appropriate as a co-ordinating agency for the Commonwealth as a whole.

SATELLITE PREDICTION SERVICE

This Establishment produces a weekly Visible Satellite Passes Bulletin, intended primarily for reproduction in the daily press for public information.

Following an offer to provide these bulletins to RAAF bases to assist initial investigations of UFO's we have received the following letter from the Secretary, Department of Air:

"The usefulness of your satellite prediction service in the identification of many unidentified flying objects reported to the RAAF has been shown by Headquarters Support Command investigations. As a result this Department wishes to take advantage of your offer of the satellite prediction bulletin to RAAF Bases and a list of the Bases nominated to receive the bulletin is enclosed".

... The first of these Bulletins is enclosed, and subsequently issues will be sent to you weekly.

CANBERRA. A.C.T. 2600.

Dear Sir,

I have been directed by the Committee to write your Department requesting a Conference, for the purpose of discussing current investigations carried out by the Air Force, into Unidentified Flying Objects, (U.F.O'S).

We await your reply with antidipation.

Yours Sincerely,

Judith M. Magee

(Mrs.) Judith M. Magee.
Hon. Secretary.
V.U.F.O.R.S.

A1-4 Please draft a letter from DAFI - the first thing we decided to ask we have and is another specific request

INVESTIGATION OF UNIDENTIFIED
FLYING OBJECT REPORTS

References : A. Our 2/25/1(15) 25th March 1966

B. Our 554/1/30(135) 22nd November 1967

1. The investigation of unidentified flying objects is understandably a tedious task and one in which the investigator may frequently have little faith or interest. Whilst this Department has every sympathy with this point of view it is nevertheless necessary to obtain as comprehensive a record as possible. The main RAAF object in investigating these reports is to determine whether Australian airspace has been violated. However, intense public interest in this matter means, unfortunately, that our investigations have to go a bit beyond security considerations, if only to reassure those more gullible than our highly trained selves.

2. Some recent reports indicate that a little more effort would perhaps have determined the cause of the sighting. Commands are therefore asked to advise the Bases under their control to fill in report forms as fully as possible.

WRE SATELLITE PREDICTION SERVICE

References: A. HQ:SPCOM 5/6/2/Air(O) 13th February 1968.

1. A copy of the referenced letter is enclosed for the information of Headquarters Operational Command.

2. This Department has written to the Director of Weapons Research Establishment requesting that both Command Headquarters and the RAAF Bases at Amberley, Edinburgh Field, Darwin, Fairbairn, Richmond, Townsville, Williamtown, East Sale and Pearce be placed on the mailing list for the WRE "Satellite Prediction Service".

3. Commands are requested to inform the Bases under their jurisdiction that they will be receiving this "Satellite Prediction Service".

SATELLITE PREDICTION SERVICE

Reference : A Your N5503/1/3 6th February 1968.

The usefulness of your satellite prediction service in the identification of many unidentified flying objects reported to the RAAF has been shown by Headquarters Support Command investigations. As a result this Department wishes to take advantage of your offer of the satellite prediction bulletin to RAAF Bases and a list of the Bases nominated to receive the bulletin is enclosed.

UFO REPORTS -
SATELLITE PREDICTION SERVICE

1. Reference is made to Weapons Research Establishment letter K5803/1/3, a copy of which was forwarded by the originator direct to Department of Air.

2. In order to produce a more accurate assessment of UFO reports, this Command took action in November 1967 to obtain regular copies of the Department of Supply's "Satellite Prediction Service". The information provided by this service has enabled a number of UFO reports to be positively identified as satellite sightings.

3. Having verified the usefulness of this service, it is now intended, in the near future, to obtain additional copies for Support Command bases that frequently handle initial reports on UFO sightings - that is, Pearce and East Sale.

4. Your Department may wish to advise Operational Command of the availability of this Prediction Service, or may care to order copies of the publication on behalf of ALL RAAF subscribers.

Note
Seen HQ Operations. They would like this to be sent to receive this publication

IMPROVEMENTS TO SATELLITE PREDICTION SERVICES

Thank you for the questionnaire returned under cover of your letter, ref. 5/8/Air (98), of 19th January, 1968.

2. The comment made against question 7 indicated that the current layout of the Visible Satellite Passes Bulletin is satisfactory, and asked whether a similar service was available for "other country" satellites.

3. Information is regularly received from N.A.S.A. on over 400 objects which are in earth orbits, and these include satellites launched from countries other than the U.S.A. The satellites being predicted for Australian capital cities are those which have a magnitude of brightness which makes them suitable for viewing with the naked eye, but excludes short-lived satellites which may come into that category. It just so happens that these are all launched by the U.S.A.; should one be launched by another country which would fall into that category, it would be included. Of course, the main purpose of the prediction bulletins is to advise the public of the easily seen satellites; there are other visible objects, such as boosters, which may orbit for several days, but we are not able to include these.

4. It is our intention to provide the predictions in a different format, and at present, the best method appears to be a separate sheet for each city, with the satellites listed in chronological order. Queries from the public relate to one particular location, with time specified, and thus the document search will be speeded up. This method would also be more suitable for reproduction in newspapers.

5. It has been suggested that some certain R.A.A.F. bases have the responsibility for initial investigation of reports of U.F.O.'s, the officer concerned may find the prediction bulletins of some use. If you concur please advise the addresses concerned, and these will be included on the distribution list.

Secretary,
Dept. of Air,
